Guidelines for Elective III & IV Enrollment & Completion
1. The student has the provision to enroll for certification, elective 3 & 4 courses during 1st year summer

	FORM	**Document #: FMCD2005**	
	ISO 9001: 2015- KLE TECH		**Rev: 1.1**
KLE TECH.	Department of Master of Computer Applications		
Curriculum Content- Course wise			**Page 7 of 107**
			Year: 2021-23

vacation and complete by IV semester.

2. The student is allowed to choose the courses from the list of Certification & MOOC courses approved by the department.
3. The evaluation of certification, Electives 3 & 4 courses is conducted during the course as per the In Semester Assessment (ISA) rubrics.
4. The certification course has to of minimum 10 hours.
5. The certification course can be from any learning platform like Coursera, Udemy, Swayam, W3Schools and alike. It can be a Value-Added Course from any educational institution.
6. ISA rubrics includes Seminar, Programming assignment, and Quiz.

I Semester MCA curriculum content

Course Code: **20ECAC701**	Course Title: Data Structures using C	
L-T-P: **4-0-2**	Credits: 6	Contact Hrs: **8**
ISA Marks: **50**	ESA Marks: **50**	Total Marks: **100**
Teaching Hrs: **50+48**		Exam Duration:**3Hrs**

No	Content	Hrs
	Unit I	
1	**Chapter No. 1 : Overview of C** Information and its meaning, Data Types, Control Statements, Control Structures, Arrays Using One -dimensional Arrays, Implementing One-dimensional Arrays, Arrays as Parameters, Character Strings, Character String Operations, Structures, Implementing Structures, Structure as Parameter, Unions, Implementation of Unions, Allocation of Storage and Scope of Variables, Pointers, Dynamic Memory Allocation and Cancellation..	**10 Hrs**
2	**Chapter No.2: Stacks** Definition and examples, Primitive operations, Example, The stack as an ADT, Representing stacks in C, Implementing the pop operation, Testing for exceptional conditions, Implementing the push operation, Examples for infix, postfix, and prefix expressions, Basic definition and examples, Program to evaluate a postfix expression, Converting an expression from infix to postfix, Program to convert an expression from infix to postfix.	**5 Hrs**
3	**Chapter No. 3: Recursion** Recursive definition and processes, Factorial function, Multiplication of natural numbers, Fibonacci sequence, Binary search, Properties of recursive definition or algorithm. Recursion in C, Factorial in C, Fibonacci numbers in C, Binary search in C, Towers of Hanoi problem	**5 Hrs**
	Unit II	
4	**Chapter No. 4 : Queues and Lists** The queue and its sequential representation, the queue as ADT, C implementation of queues, Insert operation, Priority queue, and array implementation of a priority queue. Linked lists, Inserting and removing nodes from a list, Linked implementation of stacks, get node and free node operations, Linked implementation of queues, Linked list as a data structure, Example of list operations, Header nodes, Lists in C, Array implementation of lists, Limitations of array implementation, allocating and freeing dynamic variables, Linked lists using dynamic variables, Queues as lists in C, Examples of list operations in C, Non integer and non- homogeneous lists, Other list structures: Circular lists, Stack as a circular list, Queue as a circular list, Primitive operations on circular lists, doubly linked lists	**10 Hrs**
5	**Chapter No. 5: Trees and Graphs** Binary trees, operations on binary trees, Applications of binary trees, Binary tree	**10 Hrs**

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		

Curriculum Content- Course wise	**Page** 9 **of** 107
	Year: 2021-23

representation, Node representation of binary tree, Internal and external nodes, Implicit array representation of binary trees, Choosing a binary tree representation, Binary tree traversal in C, Threaded binary trees. Graphs: Definitions, Application of graphs, and C representation of graphs, Traversal methods for graphs, Depth first traversal, and Breadth first traversal.

	Unit – III	
6	**Chapter No. 6: Sorting** Bubble Sort, Quick Sort, Selection Sort, Tree Sorting: Binary Tree Sort, Heap Sort Insertion Sorts: Simple Insertion, Shell Sort, Address Calculation Sort, Merge and Radix Sort.	**5 Hrs**
7	**Chapter No. 7: Searching** Basic Search Techniques: Algorithmic notation, Sequential searching, Searching an ordered table, Indexed sequential search, Binary search, Interpolation search, Tree searching: Inserting into a Binary Search Tree, Deleting from a Binary Search Tree, Hashing: Resolving hash clashes by open addressing, Choosing a hash function	**5 Hrs**

Activities

#	TOPICS	ACTIVITY	WEIGHTAGE
1	Arrays, functions, pointers, structures and dynamic memory allocation in C.	Program to demonstrate the following for a given set of elements: ● Array as a parameter ● Structure as a parameter ● Process of allocating memory during program execution	10
2	Stack data structure	Program to illustrate implementation of stack using the following:	10

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise			Page 10 of 107
			Year: 2021-23

		● Array ● Structures ● Functions and pointers.	
3	Applications of stack	Implement the two application of stack. ● Postfix expression evaluation ● Conversion of Infix expression to Postfix expression	10
4	Recursion	Write recursive functions in C program for the following: ● Simple recursive functions: Tower of Hanoi, factorial, Fibonacci series. ● Reverse a stack using recursion ● Sort a stack using recursion	10
5	Queue and Circular Queue concepts	Program to illustrate implementation of queue and circular queue using array	10
6	Queue.	Implementation of queue using Linked list	10
7	Singly Linked List and Circular Linked List.	Implementation of singly and circular linked list.	10
8	Doubly Linked List	Perform all the operations on doubly linked list	10
9	Searching and sorting techniques.	Implementation of the following searching and sorting techniques: Linear search, binary search, insertion sort, heap sort, quick sort.	10
10	Tree and graph traversal	● Construction and traversal of binary search tree ● Program to demonstrate the graph traversal.	10

Activities

#	TOPICS	ACTIVITY	WEIGHTAGE
1	Conceptual Data Modeling Using Entities and Relationships	Draw the ER diagrams for the following databases* i) Student-Enrollment Data base ii) Insurance Database iii) Company Database iv) Movie Database	15
2	The Basic (Flat) Relational Model and Relational Algebra	Convert the ER diagrams mentioned in activity 1 to Relational Schema diagrams.	15
3	SQL	SQL query implementation for following schemas * i) Student-Enrollment Data base ii) Insurance Database iii) Company Database iv) Movie Database	50
4	Database Design	Assignments on Normalization	10
5	Transaction Processing	Assignments on Transaction Processing	10
		Total	**100**

Schemas *

	FORM	**Document #:**	
KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications	**FMCD2005**	**Rev: 1.1**

Curriculum Content- Course wise	**Page** 14 **of** 107
	Year: 2021-23

i)Student-Enrollment Database.

Consider the following relations:

Student(<u>snum: integer</u>, sname: string, major: string, level: string, age: integer)

Class(<u>name: string</u>, meets at: string, room: string, fid: integer)

Enrolled(<u>snum: integer, cname: string</u>)

Faculty(<u>fid: integer</u>, fname: string, deptid: integer)

Enrolled has one record per Student-class pair such that the student is enrolled in the class.

Write the following queries in SQL.

1. Create the above tables by properly specifying all the integrity constraints.

2. Insert at least five tuples into each table.

3. Find the names of all Juniors (level=JR) who are enrolled in a class taught by I.John.

4. For each level, print the level and the average age of students for that level.

5. Find the names of students not enrolled in any class.

ii) Insurance Database.

Consider the insurance database given below.

PERSON (driverid: String, name: String, address: String)

CAR (regno: String, model: String, year: Int)

ACCIDENT (repno: Int, dat: Date, location: String)

OWNS (driverid: String, regno: String)

PARTICIPATED (driverid: String, regno: String, repno: Int, damageamt: Int)

 Write the following queries in SQL.

1. Create the above tables by properly specifying the integrity constraints.

2. Enter at least five tuples for each relation.

3. Demonstrate how you

* Update the damage amount for the car with a specific Regno in the accident with report number 12 to 25000

* Add a new accident to the database

4. Find the total number of people who owned cars that were involved in accidents in 2002.

5. Find the number of accidents in which cars belonging to a specific model were involved.

iii)Company Database:

- The company is organized into departments.Each department has a unique name, a unique number, and a particular employee who manages the department.We keep track of the start date when that employee began managing the department.A department may have several locations.
- A department controls a number of projects, each of which has a unique name,a unique number,and a single location.
- We store each employee's name,Social Security number, address,salary,gender) and birth date. An employee is assigned to one department, but may work on several projects, which are not necessarily controlled by the same department. We keep track of the current number of hours per week that an employee works on each project. We also keep track of the direct supervisor of each employee (who is another employee).
- We want to keep track of the dependents of each employee for insurance purposes.We keep each dependent's first name,gender,birth date,and relationship to the employee.

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		

Curriculum Content- Course wise	Page 15 of 107
	Year: 2021-23

Write the following queries in SQL for the Company database
1. To display the details of all the Employee whose first name starts with "S".
2. To display name and address of all employee who work for "MCA" department.
3. To display the names of employee who do not have supervisor.
4. To retrieve First name and salary of all employees in department 5 whose salary is between Rs.30,000 and 40,000.
5. For each department , to retrieve the department number, the number of employees in that department and their average salary.

iv)Movie Database

Movie Database. Data requirements of movie industry are captured.

•Each movie is identified by title and year of release. Each movie has length in minutes and classified under one genres (like action, horror etc.). Each movie has a plot outline.

•Production companies are identified by name and each has an address. A production company produces one or more movies.

•Actors are identified by id. Other details like name and date of birth of actors are also stored. Each actor acts in one or more movies. Each actor has a role in movie.

•Directors are identified by id. Other details like name and date of birth of directors are also stored. A Director can act in a movie (including the one that he or she may also direct). Each director directs one or more movies.

•Each movie has one or more actors and one or more directors and is produced by a production company.

Solve the following queries in SQL:-

a. List the details of horror movies released in 2012 and directed by more than 2 directors.

b. List the details of actors who acted in movies having same titles but released before 2000 and after 2010.

c. List the details of production companies producing maximum movies.

d. List the details of movies where director and actor have same date of birth.

e. Retrieve the names of directors directed all the movies produced by any one production company.

4	**CHAPTER 4 Network Layer – Data Plane** Introduction to Data and Control Plane, Virtual Circuit and Datagram Networks, Internet Protocol: Datagram Format, Fragmentation, IP Addressing, NAT, IPv6	**6 Hrs**
5	**CHAPTER 5 Network Layer- Routing Algorithms** The Link-State (LS) Routing Algorithm, The Distance-Vector (DV) Routing Algorithm, Hierarchical Routing, Routing in the Internet ,intra-AS Routing in the Internet: RIP , Intra-AS Routing in the Internet: OSPF, Inter-AS Routing: BGP.	**6 Hrs**
6	**CHAPTER 6: Data Link Layer** **Introduction to the Link Layer, Error-Detection and -Correction Techniques : Parity Checks, Check summing Methods, Cyclic Redundancy Check (CRC),Hamming Code**	**4 Hrs**
	Unit – III	
7	**CHAPTER 7: Data Link Layer (Continued..)** **Multiple Access Links and Protocols: Channel Partitioning Protocols, Random Access Protocols: Aloha, Slotted Aloha, CSMA, CSMA/CD, CSMA/CA, Taking-Turns Protocols, The Link-Layer Protocol for Cable Internet Access, Link-Layer Addressing and ARP, Ethernet and LAN standards**	**4 Hrs**
8	**CHAPTER 8: Security In Computer Networks** What is Network Security, Principles of cryptography, Message Integrity and Digital Signatures, End point authentication, Securing E-Mail, Securing TCP Connections,Network Layer Security IPSec and VPN,Operational Security:Firewalls and Intrusion detection systems	**4 Hrs**

Activities

#	TOPICS	ACTIVITY	WEIGHTA GE
1	**Introduction to Data Communications**	1. Overview of networks and layered communications	10
2	**Physical Layer:** Cable constructions and testing of different cable connectivity	1. Practice the cable construction for twisted pairs and fiber optics. 2. Test the configured cable connectivity.	15
3	**Physical Layer:** Analyzing the packet content using network monitoring tools	1. Understanding of packet capture using network interface. 2. Analyze the content of the packet using Wireshark tool correlated with OSI model.	15
4	**Physical Layer ,Data Link Layer:** Understanding of network devices and protocol simulation tool	1. Understanding of different network devices used for data communication. 2. Illustrate packet tracer simulation tool for design of the network.	15
5	**Data Link Layers:** ARQ Protocol implementation using C Program.	1. Implement the different supported ARQ protocols implementation using C Program.	15
6	**Network Layer:** Network Operations and troubleshooting	1. Outline the network properties and testing the network connectivity. 2. Explain the addressing protocols.	15
7	**Network Layer:**	1. Simulation and Implementation of Routing Protocols.	15

	Year: 2021-23

3	**Chapter 3 : Process Synchronization** Synchronization: The Critical section problem; Peterson's solution; Synchronization hardware; Semaphores; Classical problems of synchronization; Monitors	**7 Hrs**
	Unit II	
4	**Chapter 4 : Deadlocks** Deadlocks: System model; Deadlock in Multithreaded application, Deadlock characterization; methods for handling deadlocks; Deadlock prevention; Deadlock avoidance; Deadlock detection and recovery from deadlock	**6 Hrs**
5	**Chapter 5 : Memory Management** Memory Management Strategies: Background; Swapping Contiguous memory allocation; Paging Structure of page table; Segmentation Virtual Memory Management: Background; Demand paging; Copy-on-write; Page replacement Allocation of frames; Thrashing.	**7 Hrs**
6	**Chapter 6 : Implementation of File System** **File System: File concept; Access methods Directory structure, File system mounting File sharing; Protection. Implementing File System: File system structure File system implementation; Directory implementation; Allocation methods; Free space management**	**7 Hrs**
	Unit – III	
7	**Chapter 7: Secondary Storage Structures, Protection** **Mass storage structures; Disk structure; Disk attachment; Disk scheduling; Disk management; Swap space management. Protection: Goals of protection, Principles of protection Domain of protection, Access matrix Implementation of access matrix, Access control, Revocation of access rights, Capability-Based systems**	**5 Hrs**
8	**Chapter 8: Case study – Linux operating system** Design principles Kernel modules, Process management Scheduling, memory Management File systems, Input & output, Interprocess Communication.	**5 Hrs**

Activities

Implement the following programs using C programs.

	FORM	Document #: FMCD2005	Rev: 1.1
	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		

Curriculum Content- Course wise	Page 21 of 107
	Year: 2021-23

#	TOPICS	ACTIVITY
1	**UNIX Commands System Calls.**	Program to simulate Unix commands and System calls.
2	**Process Management and Scheduling**	Program to simulate the following non-preemptive CPU scheduling algorithms to find turnaround time and waiting time. a) FCFS b) SJF c) Round Robin (pre-emptive) d) Priority
3		Program to simulate multi-level queue scheduling algorithm considering the following scenario. All the processes in the system are divided into two categories – system processes and user processes. System processes are to be given higher priority than user processes. Use FCFS scheduling for the processes in each queue.
4	**Process Synchronization**	Program to simulate and Producer Consumer Problem using semaphores
5		Program to simulate Dining Philosopher's problem
6	**Memory Management Techniques**	Program to simulate the following contiguous memory allocation techniques a) Worst-fit b) Best-fit c) First-fit
7		Program to simulate paging technique of memory management.
8	**Deadlock Avoidance**	Program to implement Banker's algorithm.
9	**Disk Scheduling**	Program to simulate disk scheduling algorithms a) FCFS b) SCAN c) C-SCAN
10	**Page replacement algorithms**	Simulate the following page replacement algorithms: FIFO,LRU and Optimal

No	Content	Hrs.
	Unit I	
1	**Chapter No. 1 Introduction of Software Engineering process** Professional software development, Software engineering ethics, Case studies, Software processes: Software process models, Process activities, Coping with change, Process improvement	7 Hrs.
2	**Chapter No. 2 Agile Software Development** Agile methods, Agile development techniques, Agile project management. Scaling agile methods	7 Hrs.
3	**Chapter No. 3 Requirement Engineering** Functional and Non-functional requirements, Requirements Engineering processes, Requirements elicitation, Requirement specification, Requirements validation; Requirements change.	6 Hrs.
	Unit II	
4	**Chapter No. 4. System Modeling** Context models, Interaction Models, Structural models, Behavioural models. model driven architectures	7 Hrs.
5	**Chapter No. 5. Architectural Design** Architectural Design Decisions, Architectural views, Architectural patterns, Application Architectures	7 Hrs.
6	**Chapter No. 6. Design and implementation** Object oriented design using UML, design patterns, Implementation Issues, Open source development.	6 Hrs.
	Unit – III	
7	**Chapter No. 7 Software Testing** Development Testing, Test Driven Development, Release Testing, User Testing.	5 Hrs.
8	**Chapter No. 8 Configuration management** Change management, Version management, System building, Release management.	5 Hrs.

Text Books

1. Ian Summerville, Software Engineering, 10[th]e, Pearson Ed, 2018

Activities

#	TOPICS
1	To study engineering design tools like Rational Rose, ERD+, and Lucciey chart. .
2	To understand the activities of agile development by considering case study's
3	Select any one suggested domain and write SRS (IEEE standard) structure for the given statement
4	To understand basics of UML and its building blocks, and Design and develop a simple model by considering OO Methodologies
5	To understand the basics of DFD and design a system for a given case study using ERD+ tool.
6	Develop an application that makes use of Rose tool for building different object oriented models for architectural model develop an Run Time and Compile time models..
7	To understand Software Testing tools practice. like gtest Testing tool for unit testing
8	To understand Configuration management open source tool

Evaluation Scheme

Teaching Hrs: 40+24			Exam Duration: 3 hrs

No	Content	Hrs
	Unit I	
1	**Chapter 1: Introduction, Parallel and distributed systems** Network-centric computing and network centric content, peer-to-peer systems, Cloud computing basics, delivery models and services, Ethical issues, cloud vulnerabilities, major challenges; parallel computing, parallel computer architecture, Distributed systems, communication protocol and process coordination, logical clocks, message delivery rules, casual delivery, Concurrency, atomic actions, consensus protocols, modularity: client-server paradigm.	6
2	**Chapter 2: Cloud Infrastructure** Cloud computing at Amazon, cloud computing: the Google perspective, Microsoft windows Azure and online services; open-source software platforms for private clouds; Cloud storage diversity and vendor lock-in; Cloud computing interoperability: the intercloud; Energy use and ecological impact of large-scale data centers; Service and compliance level agreements; User experience; Software licensing.	6
3	**Chapter 3: Cloud Computing: Applications and Paradigms** Challenges for cloud computing; Existing cloud applications and new application opportunities; Architectural styles for cloud applications; Workflows: Coordination of multiple activities; The MapReduce programming model; Case studies.	4
	Unit II	
4	**Chapter 4: Cloud Resource Virtualization** Virtualization; Layering and virtualization; Virtual machine monitors; Virtual machines; Performance and security isolation; Full virtualization and Para virtualization; Hardware support for virtualization; Case study; Optimization of network virtualization; vBlades; A	6

	FORM	Document #: FMCD2005	Rev: 1.1

		Year: 2021-23	

	performance comparison of virtual machines; Software fault isolation;	
5	**Chapter 5: Cloud Resource Management and Scheduling**	6
	Policies and mechanisms for resource management; Applications of control theory to task scheduling on a cloud; Stability of a two-level resource allocation architecture; Feedback control based on dynamic thresholds; Coordination of specialized autonomic performance managers; A utility-based model for cloud-based web services; Resource bundling; Scheduling algorithms for computing clouds; Fair queuing; Resource management and dynamic application scaling.	
6	**Chapter 6: Networking Support**	4
	Packet-switched networks; The Internet; Internet migration to IPV6; The transformation of the Internet; Web access and the TCP congestion control window; Network resource management; Interconnection networks for computer clouds; Content-delivery networks; Overlay networks and small-world networks.	
	Unit – III	
7	**Chapter 7: Storage Systems**	4
	The evolution of storage technology; Storage models, file systems and databases; Distributed file systems: The precursors; General parallel file system; Google File System; Apache Hadoop; Locks and Chubby: A locking service; Transaction processing and NoSQL and databases; BigTable; Megastore.	
8	**Chapter 8: Cloud Security**	4
	Cloud security risks; Security: The top concern for cloud users; Privacy and privacy impact assessment; Trust; Operating system security; Virtual machine security; Security of virtualization; Security risks posed by shared images; Security risks posed by a management OS; A trusted virtual machine monitor.

ACTIVITIES			
#	TOPICS	ACTIVITY	WEIGHTAGE
1	Introduction, Parallel and distributed systems	Compare the three cloud computing delivery models, SaaS, PaaS, and IaaS, from the point of view of the application developers and users. Discuss the security and the reliability of each one of them. Analyze the differences between the PaaS and the IaaS. An IT company decides to provide free access to a public cloud dedicated to higher education. Which one of the three cloud computing delivery models, SaaS, PaaS, or IaaS should it embrace and why? What applications would be most beneficial for the students? Will this solution have an impact on distance learning? Why? What is in your opinion the critical step in the development of a systematic approach to all-or-nothing atomicity? What does a systematic approach means? What are the advantages of a systematic versus an ad-hoc approach to atomicity?	15
2	Cloud Infrastructure	Several desirable properties of a large-scale distributed system includes transparency of access, location, concurrency, replication, failure, migration, performance, and scaling. Analyze how each one of these properties applies to AWS. Demonstration Cloud services using AWS or Azure or Google Cloud. Compare the Oracle Cloud offerings (see https://cloud.oracle.com) with the cloud services provided by Amazon, Google, and Microsoft.	15
3	Cloud Computing: Applications and Paradigms	Download and install the Zookeper from the site http://zookeeper.apache.org/. Use the API to create the basic workflow patterns or Use the AWS CloudFormation service to create the basic workflow patterns. Search the web for reports of cloud system failures and discuss the causes of each incident. Research the power consumption of processors used in mobile devices and their energy efficiency. Rank the components of a mobile device in terms of power consumption. Establish a set of guidelines to minimize the power consumption of mobile applications.	10
4	Cloud Resource Virtualization	Virtualization simplifies the use of resources, isolates users from one another, supports replication and mobility, but exacts a price	15

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		

Curriculum Content- Course wise	**Page** 39 **of** 107
	Year: 2021-23

		in terms of performance and cost. Analyze each one of these aspects for: (i) memory virtualization, (ii) processor virtualization, and (iii) virtualization of a communication channel.	
		Virtualization of the processor combined with virtual memory management pose multiple challenges; analyze the interaction of interrupt handling and paging.	
		In Section 5.6 we state that a VMM for a processor can be constructed if the set of sensitive instructions is a subset of the privileged instructions of that processor. Identify the set of sensitive instructions for the x86 architecture and discuss the problem each one of these instruction poses.	
5	Cloud Resource Management and Scheduling	Analyze the benefits and the problems posed by the four approaches for the implementation of resource management policies: control theory, machine learning, utility based, market-oriented.	15
		Can optimal strategies for the five classes of policies, admission control, capacity allocation, load balancing, energy optimization, and QoS guarantees be actually implemented in a cloud? Support your answer with solid arguments.	
		Multiple controllers are probably necessary due to the scale of the cloud. Is it beneficial to have system and application controllers? Justify your answers.	
6	Networking Support	Implementation Simple IPC (Client Server Communication) Simple chat server multi-threaded File Server	10
7	Storage Systems	Analyze the reasons for the introduction of storage area networks (SANs) and their properties.	10
		Block virtualization simplifies the storage management tasks in SANs. Provide solid arguments in support of this statement.	
		The designers of the Google file system (GFS) have re-examined the traditional choices for a file system. Discuss observations regarding these choices that have guided the design of GFS.	
8	Cloud Security	Write a survey paper on cloud computing security: Issues, threats, and solutions	10

Course Code:**21ECAC802**		Course Title: **Programming C# with .Net**	
L-T-P: 3-0-1		Credits: 4	Contact Hrs: 5
ISA Marks: 50		ESA Marks: 50	Total Marks: 100
Teaching Hrs: 40+24			Exam Duration: 3 hrs
Content			**Hrs**
Unit – 1			
Chapter No. 1.The Philosophy of .NET Understanding the Previous State of Affairs, The .NET Solution, Introducing the Building Blocks of the .NET Platform (CLR,CTS, and CLS), The Role of the .NET Base Class Libraries, What C# Brings to the Table, An Overview of .NET Assemblies, The Role of the Common Intermediate Language , The Role of .NET Type Metadata, The Role of the Assembly Manifest, Compiling CIL to Platform –Specific Instructions, Understanding the Common Type System, Intrinsic CTS Data Types, Understanding the Common Languages Specification, Understanding the Common Language Runtime, The Assembly/Namespace/Type Distinction, Using ildasm.exe, Deploying the .NET Runtime, The Platform independent nature of .NET, Installing the .NET Framework, C# Command-Line Compiler, Building C# Applications using csc.exe, Working with csc.exe Response Files.			6 hrs
Chapter No. 2.C# Language Fundamentals.			5 hrs

	FORM ISO 9001: 2015- KLE TECH Department of Master of Computer Applications	**Document #:** **FMCD2005**	**Rev: 1.1**
Curriculum Content- Course wise		**Page 52 of 107**	
		Year: 2021-23	

The Anatomy of a Simple C# Class, An Interesting Aside : The System.Environment Class, Defining Classes and Creating objects, The System.Console Class, Establishing Member Visibility, Default Values of Class Member Variables, Member Variable Initialization Syntax, Defining Constant Data, Defining Read-only fields, Understanding the static keyword, Method Parameter Modifiers, Iteration Constructs, Decision Constructs and the Relational/Equality Operators, Understanding Value Types and Reference Types, Understanding Boxing and Unboxing Operations, Working with .NET Enumerations, The Master Class: System.Object, Overridding some default behaviours of System.Object, The System Data types(and C# Shorthand notation), The System.String data types, The role of System.Text.StringBuilder, .NET Array Types, Understanding C# Nullable Types, Defining Custom Namespaces	
Chapter No. 3. Object-Oriented Programming with C# Understanding the C# Class Type, Reviewing the Pillars of OOP, The First Pillar: C#'s Encapsulation Services, The Second Pillar: C#'s Inheritance Support, Programming for Containment/Delegation, The Third Pillar: C #'s Polymorphic Support, C# Casting rules, Understanding C# Partial types, Documenting C# Source Code via XML	5 hrs
Unit – 2	
Chapter No. 4.Object Lifetime and Exceptions Handling. Classes, Objects and References, the basics of Object Lifetime, The role of Application Roots, Understanding Object Generations, System.GC type, Building Finalizable Objects, Building Disposable Objects, Building Finalizable and Disposable types. Ode to Errors, Bugs, and Exceptions, The Role of .NET Exception Handing, The Simplest possible example, Configuring the state of an exception, System – Level Exception (System. System Exception), Application-Level Exception (System.ApplicationException), Processing Multiple Exception, The Finally Block, The result of unhandled exceptions, Debugging Unhandled exceptions using VS. NET.	6 hrs
Chapter No. 5.Interfaces and Collections Defining Interfaces in C#, Implementing an Interface in C#, Contrasting Interfaces to Abstract Base Classes, Invoking Interface Members at the Object Level, Interfaces As Parameters, Interfaces As Return Values, Arrays of Interfaces Types, Understanding Explicit Interface Implementation, Building Interface Hierarchies, Implementing Interfaces Using Visual Studio 2005, Building Enumerable Types(IEnumerable and IEnumerator), Building CloneableObjects(IConeable), Building Comparable Objects(IComparable), The Interfaces of the System.Collections Namespace, The Class Types of System.Collections.	5 hrs
Chapter No. 6.Callback Interfaces, Delegates, and Events, Advanced C# Techniques Understanding Callback Interfaces, Understanding the .NET Delegate type, Defining a Delegate in C#, The System.multicastDelegate and System.Delegate Base Classes, Investigating a Delegate Object, Delegates as Parameters, Understanding C# Events Building a Custom Indexer, Internal Representations of Type Indexers: Final Details, Understanding Operator Overloading Binary Operators, Unary Operators, Equality Operators, Comparison Operators, Understanding Custom Type Conversions, The Advanced Key words of C#, C# Preprocessor Directives.	5 hrs
Unit – 3	
Chapter No. 7.Records	4 hrs

Linux Administration Practices

COURSE DESCRIPTION:

IT infrastructure consists of a set of physical devices and software applications that are required to operate the entire enterprise. IT infrastructure is also consists both human and technical capabilities. These services include the following- Computing platforms used to provide computing services, that connect employees, customers, and suppliers into a coherent digital environment, including servers ,Data management services that store and manage corporate data and provide capabilities for analyzing the data and Application software services that provide enterprise-wide capabilities such as enterprise resource planning, customer relationship management, supply chain management, and knowledge management systems that are shared by all business units. It allows an organization to deliver IT solutions and services to its employees, partners and/or customers and is usually internal to an organization and deployed within owned facilities.

OBJECTIVES

- o Acquire comprehensive knowledge, technical expertise and hands-on experience in IT Infrastructure Management
- o To learn all aspects of IMS such as Networking, Operating Systems, Virtualizations and Data Center technologies.

LAB REQUIREMENTS:

- o A modern web-browser with HTML5 and JavaScript enabled.
- o Remote Desktop Client connection software.
- o Internet connectivity Microsoft Account (LiveID).

LIST OF EXERCISES

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		
Curriculum Content- Course wise		**Page** 57 **of** 107	
		Year: 2021-23	

#	Topics	ACTIVITY	WEIGHTAGE
1	Web Server	Apache Web Server, IIS Server: Install and Configure the Apache Web Server on Linux and IIS server on windows.	10
2	Samba Server	Implementation of Windows files and print services for Linux allowing the sharing of files and printers between Windows and Linux.	10
3	LDAP Server	LDAP Server: Lightweight Directory Access Protocol- Server Installation to access a directory service.	10
4	Mail Server	Mail Server configuration- POP3 Server, IMAP Server	10
5	Proxy Server	Develop a small web proxy server, which is able to cache web pages. It is a very simple proxy server which only understands simple GET-requests, but is able to handle all kinds of objects - not just HTML pages, but also images.	10
6	Firewalls and NAT (Network Address Translation)	Use of iptables to build a permissive firewall by selectively filtering packets based on protocol type. To demonstrate how addresses may be translated from private addresses to public and vice versa as they pass in and out of the firewall.	20
7	Cloud Infrastructure: Azure Hands-on Build your Infrastructure in the Cloud using Windows Azure Infrastructure Services -	1. Login to the Windows Azure Management Portal, Define a new Windows Azure Affinity Group and Create a new Windows Azure Storage Account. 2. Register a DNS Server in Windows Azure. 3. Define a Virtual Network in Windows Azure. 4. Configure Windows Server Active Directory in a Windows Azure VM. 5. Configure New Machine for File Services in a Windows Azure VM.	30

Curriculum Content- Course wise	**Page** 59 **of** 107
	Year: 2021-23

	Kanban, and the delivery pipeline, Wrapping up – a complete example, Identifying bottlenecks.	
3	**Chapter 3 : How DevOps Affects Architecture** Introducing software architecture, The monolithic scenario, The Twelve Factors, Architecture rules of thumb, The separation of concerns, The principle of cohesion, Coupling, Back to the monolithic scenario, A practical example, Three-tier systems, The presentation tier, The logic tier, The data tier, Handling database migrations, Rolling upgrades, Hello world in Liquibase, The changelog file, The pom.xml file, Manual installation, Microservices, Interlude – Conway's Law, How to keep service interfaces forward compatible, Microservices and the data tier, DevOps, architecture, and resilience.	**5 Hrs**
4	**Chapter 4 : Everything is Code** The need for source code control,The history of source code management, Roles and code, Which source code management system? A word about source code management system migrations, Choosing a branching strategy, Branching problem areas, Artifact version naming, Choosing a client, Setting up a basic Git server, Shared authentication, Hosted Git servers, Large binary files, Trying out different Git server implementations, Docker intermission, Gerrit : a) Installing the git-review package, b)The value of history revisionism, The pull request model, GitLab.	**5 Hrs**
	Unit II	
5	**Chapter 5 : Building the Code** Why do we build code? The many faces of build systems, The Jenkins build server, Managing build dependencies, The final artifact, Cheating with FPM, Continuous Integration, Continuous Delivery, Jenkins plugins, The host server, Build slaves, Software on the host, Triggers, Job chaining and build pipelines, A look at the Jenkins filesystem layout, Build servers and infrastructure as code, Building by dependency order, Build phases, Alternative build servers, Collating quality measures, About build status visualization, Taking build errors seriously, Robustness.	**3 Hrs**
6	**Chapter 6 : Testing the Code** Manual testing, Pros and cons with test automation, Unit testing, JUnit in general and JUnit in particular, A JUnit example, Mocking, Test Coverage, Automated integration testing, Docker in automated testing, Arquillian, Performance testing, Automated acceptance testing, Automated GUI testing, Integrating Selenium tests in Jenkins, JavaScript testing, Testing backend integration points, Test-driven development, REPL-driven development, A complete test automation scenario : Manually testing our web application, Running the automated test, Finding a bug, Test walkthrough, Handling tricky dependencies with Docker.	**3 Hrs**
7	**Chapter 7 : Deploying the Code** Why are there so many deployment systems? Configuring the base OS, Describing clusters, Delivering packages to a system, Virtualization stacks: Executing code on the client, A note about the exercises, The Puppet master and Puppet agents, Ansible, Deploying with Chef, Deploying with SaltStack, Salt versus Ansible versus Puppet execution models, Vagrant, Deploying with Docker, Comparison tables, Cloud solutions, AWS, Azure.	**5 Hrs**
8	**Chapter 8 : Monitoring the Code** Nagios, Munin, Ganglia, Graphite, Log handling, Client-side logging libraries, The ELK stack.	**5 Hrs**

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		

Curriculum Content- Course wise	**Page** 60 **of** 107
	Year: 2021-23

Unit – III		
9	**Chapter 9 : Issue Tracking** What are issue trackers used for? Some examples of workflows and issues, What do we need from an issue tracker? Problems with issue tracker proliferation, All the trackers : Bugzilla, Trac, Redmine, The GitLab issue tracker, Jira**.**	**4 Hrs**
10	**Chapter 10 : The Internet of Things and DevOps** Introducing the IoT and DevOps, The future of the IoT according to the market, Machine-to-machine communication, IoT deployment affects, software architecture, IoT deployment security, Okay, but what about DevOps and the IoT again?, A hands-on lab with an IoT device for DevOps.	**4 Hrs**

DevOps Practice Exercise:

SI NO.	TOPIC	ACTIVITY	WEIGTHAGE
1.	**DevOps basics:** Learn the origins of DevOps and the basic principles and techniques.	Lab Practice, Assignment and Quiz	10
2.	**AWS crash course:** Hands-on session where you learn to use the most important AWS services, including IAM, EC2, ASG, EBS, ELB, S3, and RDS.	Lab Practice, Assignment and Quiz	10
3.	**Infrastructure as code**: Overview of different techniques to manage infrastructure, including ad-hoc scripts (e.g., Bash, Python), configuration management tools (e.g., Chef, Puppet), machine images (e.g., VMs, Docker), and provisioning tools (e.g., Terraform, CloudFormation).	Lab Practice, Assignment and Quiz	10
4.	**Terraform introduction**: Go through a series of coding exercises that cover the basic Terraform syntax, state management, loops, conditionals, lifecycle management, and common gotchas.	Lab Practice, Assignment and Quiz	10
5.	**Advanced Terraform**: Go through a series of coding exercises that cover Terraform modules, file layout, keeping code DRY, team workflows, and automated testing.	Lab Practice, Assignment and Quiz	10
6.	**Immutable infrastructure:** Overview of immutable infrastructure practices, versioning artifacts, promoting artifacts through environments, and deployment.	Lab Practice, Assignment and Quiz	10
7.	**Packer introduction:** Build your own AMIs and other virtual machine images using Packer. **Docker introduction**: Create your own Docker images and deploy them using Docker orchestration tools.	Lab Practice, Assignment and Quiz	10
8.	**DevOps best practices**: Learn about continuous integration, micro services, feature toggles, canary deployments, monitoring, alerting, and log aggregation.	Lab Practice, Assignment and Quiz	10
9.	**Production readiness review:** A Gruntwork engineer goes through a checklist of questions with your team to see what work you need to do to be ready for prod. **Architecture deployment:** Deploy your customized Reference Architecture in AWS.	Lab Practice, Assignment and Quiz	10

SI.No	User Interface Design Practices	
	Activity	**Weightage**
1	Find two examples of user interfaces (might be desktop software, web applications, smartphone apps, consumer devices, car dashboards, building entrances, traffic intersections, shower controls, etc), one that you consider a good design and one that you consider a bad design. For each interface, you should: ● Describe its purpose for intended users. ● Analyze its good and bad points of usability with reference to all the dimensions of usability (learnability, visibility, efficiency, errors) Illustrate your analysis with appropriate screenshots or photographs.	5
2	Design a user interface for a specific task that communicates its conceptual model to the user more effectively, so that users are less likely to make this mistake. Sketch your ideas (alternate designs) on a whiteboard. Critique it, and update the designs.	5
3	Guided by the categories below, make a list of what needs to be made visible, and then brainstorm (and sketch) how the interface might make it visible. ● Actions: what can the user do? ● State: what is the current state of the system? ● Feedback: what was the effect of the user's actions	5

Page 68 of 107

Year: 2021-23

No	Content	Hrs
4	Explore the undo models used in single-user text editing. Choose a few different kinds of textboxes. Experiment with a web browser's undo model for text editing by typing, deleting, changing properties, and using Undo. Try to figure out: ● How many undo streams are there—one, or many? ● How is the history divided into undoable units? ● How much previous state is recovered when you undo? (Selections? cursor positions?) ● What visible feedback does Undo give? (e.g., if the Undo affects a location scrolled out of the box?)	5
5	User-centered design process, by conducting a lightweight UCD process on a few problems in the classroom.	10
6	User Analysis, Task Analysis, Domain Analysis by observing a real environment of people working.	10
7	Designing UIs by sketching.	10
8	Exploring some of the main structuring patterns of GUI software: the view tree, listeners, and model-view-controller using HTML, Javascript, and jQuery, along with a handy online HTML editor.	10
9	Explore low-fidelity prototyping by creating a simple, hand-drawn prototype in less than 5 minutes, and simulating it with another user.	10
10	Information visualization by experimenting with modifications to an existing visualization using a browser.	10
11	Exploring some of the principles and pitfalls of color design and typography.	10
12	Heuristic evaluation of an e-commerce web site. Record the usability problems found. Justify every observation by naming one or more usability heuristics (design principles) that it violates. Assign a severity rating to each problem (cosmetic, minor, major, or catastrophic). Include at least one positive usability comment, again justifying it by naming one or more heuristics.	10

WEB CONTENT MANAGEMENT SYSTEM – COURSE PROJECT

COURSE DESCRIPTION:

Today, many web publishers use content management systems (CMS) to allow them to instantly

	FORM	Document #: FMCD2005	Rev: 1.1
	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise		Page 70 of 107	
		Year: 2021-23	

and dynamically update web pages and properties as new content becomes available so that every visit to a site is engaging, informative, and meaningful. The course project shall explore any one of the three most popular open source web-based content management systems—**WordPress, Joomla, and Drupal**—to create dynamic and flexible websites and landing pages. Students shall explore the fundamentals of planning dynamic websites, CMS database management, developing CSS-controlled site templates, and creating database-driven websites through the planning and creation of their own topic-based sites.

OBJECTIVES
- Introduce learners to any one of the three most popular open source content management systems (CMS) such as WordPress, Drupal, or Joomla.
- Create, deploy and Maintain websites using CMS, including creating and editing content, adding functionality, and creating custom templates and themes.

COURSE PROJECT TITLE: BUILDING WEBSITE USING CMS (JOOMLA / WORDPRESS OR DRUPAL)

To build website for any real world examples such as Corporate web sites or portals, Online magazines, newspapers, and publications, E-commerce and online reservations, Government applications, Small business web sites, Community-based portals, School, religious web sites or Personal or family homepages using popular Web Content Management System. The website shall facilitate to create, manage, store and deploy content on the Web, including text, graphics, video or audio as a part of Enterprise Content Management.

EXECUTION PLAN:

Sl.No	Demonstration	Implementation	Weightage
1.	**Introducing Content Management Systems** o An overview of some of the different tools and methods that today's web publishers are using to create highly-tailored dynamic web content. o Purchasing and configuring a domain name and web hosting.	1. Introduction to Joomla & Installation 2. Domain Name Registration & Configuration and Hosting 3. Create a Database 4. Content Preparation and Planning	20
2.	**Introduction to Joomla** o Explore the CAM model (Categories, Articles, and Menus) approach to creating content for Joomla environments. o Administration and management of users and media. o Installing Joomla o Exploring the Admin Interface o Content creation using the CAM model	1. Write an article & put your articles in order with categories. 2. Customize Administrator's Panel 3. Change your website's look with Templates. 4. Expand your website's functionality with different extensions. 5. Content creation & Customization using the CAM model	20

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		

Curriculum Content- Course wise	**Page** 71 **of** 107
	Year: 2021-23

	o Content customization: images, video, audio, tags, formats, etc.		
3.	**Joomla Menus** o Creating and controlling menus for Joomla site. o To link to articles and create special menu items. o Adding and displaying menus o Linking menus to articles and other features	1. Categorize the articles which allow grouping your content better. 2. Create menu items for website.	20
4.	**Extending Joomla –Plug-ins, Modules** o Use of Joomla, Plug-ins, Modules, Components and other extensions. o Installation of extensions, Finding and adding Joomla extensions o Adding and setting up 2 "big" extensions (choose blog, calendar, image gallery, Paypal-based shopping cart, or portfolio. Other extensions on approval)	Select Create Joomla Modules for the website such as Feed Display Module, Footer Module, Latest News Module, Search Module, Random Image Module, Who's Online Module etc.	20
5.	**Custom Templates** o Explore the addition of creation and uses of customized Joomla templates o Modifying templates using CSS and HTML tricks.	Select and Customize template for website.	20
6.	**User management and permissions** o Explore how to manage users in Joomla site, including managing who sees what based on login, as well as who can do what based on permissions assigned.	Control the use of Captcha, registration allowed and type of registration, default user group new users, reset password, and new user registration email notice to administration.	20

4	**Symmetric block cipher**	● Using Java Cryptography, encrypt the text "Hello world" using BlowFish. Create your own key using Java keytool.	10
5		● Write a C/JAVA program to implement the BlowFish algorithm logic	10
6	**Asymmetric cryptographic algorithm**	● Write a Java program to implement RSA Algoithm	10
7		● Implement the Diffie-Hellman Key Exchange mechanism using HTML and JavaScript. Consider the end user as one of the parties (Alice) and the JavaScript application as other party (bob).	10
8	**Secure Hash Algorithm**	● Calculate the message digest of a text using the SHA-1 algorithm in JAVA.	10
9	**Intrusion detection System**	● Explore the Intrusion Detection System "Snort"	10
10		● Study of Anti-Intrusion Technique – Honey pot	10
11	**IP security**	● Study of IP based Authentication	10
		TOTAL	**100**

No	Content	Hrs
	Unit I	
1	**Chapter 1 : Statistical Analytics and Basics in Probability** Knowledge discovery: finding structure in data, Data quality versus data quantity, Statistical modeling versus statistical description. Concepts in Probability, Bayes Theorem, Random Variables, Means, variances, and expected values; Standard Distributions- Binomial, Poisson, Geometric, Uniform, Exponential and Normal (Gaussian) distribution.	08hrs
2	**Chapter 2 : Data manipulation** Data types, Data summarization, Means, medians, and central tendency, Summarizing variation, Summarizing (bivariate) correlation, Data diagnostics and data transformation, Outlier analysis, Entropy, Data transformation Simple smoothing techniques, Binning, Moving averages, Exponential smoothing. Introduction to SPSS (IBM's) statistical tool.	07hrs
	Unit II	

	FORM	Document #: **FMCD2005**	
ISO 9001: 2015- KLE TECH Department of Master of Computer Applications			**Rev: 1.1**

Curriculum Content- Course wise	Page 83 of 107
	Year: 2021-23

3	**Chapter 4 : Data visualization and statistical graphics**	08hrs
	Univariate visualization, Strip charts and dot plots, Boxplots, Stem-and-leaf plots, Histograms and density estimators, Quantile plots, Bivariate and multivariate visualization, Pie charts and bar charts,Multiple boxplots and QQ plots,Scatterplots and bubble plots, Heatmaps, Time series plots. Visualization in SPSS tool.	
4	**Chapter 5 : Techniques for supervised learning**	07hrs
	What is "supervised learning?", Simple linear regression The simple linear model, Multiple inferences and simultaneous confidence bands, Regression diagnostics, Weighted least squares (WLS) regression Correlation analysis, The correlation coefficient and Rank correlation.	
	Unit – III	
5	**Chapter 7: Techniques for unsupervised learning and Casestudy**	10hrs
	Unsupervised versus supervised learning, Principal component analysis, Principal components, Implementing a PCA, Exploratory factor analysis The factor analytic model, Principal factor estimation, Maximum likelihood estimation, Selecting the number of factors, Factor rotation, Implementing an EFA, Canonical correlation analysis. Case study on Data Analytics on Real world datasets

Teaching Hrs: **72 approx.**		Exam Duration: **3 Hours**

Students can use the following tools in web and mobile applications as well as product developments:
- Struts, Spring, Hibernate and JPA
- Machine Learning & Deep Learning
- JAXB and Apache Axis 2/Java
- JSP, Servlets, JDBC, EJB, JMS, JTA and JUnit
- Apache Tomcat, JBoss and GlassFish

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise		**Page** 85 **of** 107	
		Year: 2021-23	

- JavaScript, JSF, GWT and jQuery
- Eclipse, Netbeans and JBoss tools
- TestNG
- jBPM and Drools
- JCR

Objectives:

Help students to utilize and strengthen the knowledge of java which they have learnt in previous semester.

Methodology:

Students are asked to make a team of 3-4 members and can choose the different categories of projects like desktop applications, web applications, mobile application and distributed application and work once it is approved by the coordinator.

Assessment:

Students Assessment through CIE (50%) + SEE (50%)

Continuous Internal Evaluation	Assessment	Marks
	Problem Definition, Literature Review	05
	Synopsis and SRS Deliverables	05
	Design (Module wise algorithmic design)	10
	Coding	15
	Integration and testing	05
	Report	05
	Presentation skills and Viva-voce	05
	Total	**50**
Semester End Examination	Presentation	30
	Viva-voce	20
	Total	100

1.1   Course Objectives:

The Mini Project being part of the course work is not only a mechanism to demonstrate the abilities and specialization but also provides the opportunity to demonstrate originality, teamwork, inspiration, planning and organization in a software project. One can put into practice the techniques that have been taught throughout the previous courses. Mini-projects develop practical skills in students. The idea is to propose a problem that one might encounter in future career (be it in academia, industry, or government). Then propose a solution and implement it.

E-commerce Objectives:

	FORM	Document #: FMCD2005	Rev: 1.1
KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise		Page 86 of 107	
		Year: 2021-23	

Most business houses are shifting their operations to the online world. Right from buying apparels to computers to booking tickets and renting out apartments, everything can be done through the Internet now. It is a win-win formula for both the customers and the business houses. Digital India aims to boost E-business and the E-commerce industry with the vision that it would in turn boost the economy is a whole.

Multilingual Objectives:
Language is an essential driver of enterprise growth. The user interface is the key component of any application that needs to support various language speaking audiences. Making an app that appeals to and is available for more users broadens the market and brings more revenue in the app sales and there will be more exposure to the business.

*Evaluation***:**
   • The project assessment is done by an evaluation team as per the schedule.

.

IV Semester MCA Electives -IV

Course Code: **21ECAE810**	Course Title: **Software Practices & Testing**	
L-T-P: **3-0-0**	Credits: 3	Contact Hrs: 3
ISA Marks: **100**	ESA Marks: **-**	Total Marks: **100**
Teaching Hrs: **40**		Exam Duration:**3Hrs**

No	Content	Hrs
	Unit I	
1	**Chapter 1 : Software Practice- I** Style: Names, Expressions & Statements, Consistency & Idioms, Function Macros, Comments, Interfaces: Comma separated values, A prototype library, Interface principles, Resource Management, User Interfaces.	**4 Hrs**
2	**Chapter 2 : Software Practice- II** Algorithms & Data structures: Searching, Sorting, Libraries, Growing arrays, Lists, Trees, Hash tables, Design & Implementation: The Markov Chain algorithm, Data structure alternatives, Building the data structure in C, Generating Output, Performance, Lessons.	**4 Hrs**
3	**Chapter 3 : Software Practice- III** Performance: A Bottleneck, Timing & Profiling, Strategies for speed, Tuning the code, Space efficiency, Estimation, Portability: Language, Headers & Libraries, program	**8 Hrs**

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise		**Page** 98 **of** 107	
		Year: 2021-23	

	Organization, Isolation, Data Exchange, Byte order, Portability & upgrade, Internationalization.	
	Unit II	
4	**Chapter 4 : Software Practice- IV** Notation: Formatting data, Regular Expressions, Programmable tools, Interpreters, Compilers & Virtual Machines, Programs that write programs, Using macros to generate code, Debugging: Debuggers, Good Clues & Easy bugs, No clues & hard bugs, last resorts, Non Reproducible bugs, Debugging tools, Other people bugs.	**6 Hrs**
5	**Chapter 5 : Six Essentials of Software Testing** The six essentials of software testing, The state of the art & the state of the practice, The clean-sheet approach, Establishing practical perspective, Critical choices: What, When and how to test, Critical disciplines, Frameworks for testing	**2 Hrs**
6	**Chapter 6 : Testing method** Verification Testing: Basic verification methods, getting leverage on verification, Verifying documents at different phases, getting the best from verification, Three critical success factors for implementing verification, Recommendation, Validation Testing: Validation overview, validation methods, Validation methods, Recommendation strategies for validation testing, Controlling validation costs: Minimizing the cost performing tests, cost of maintaining the tests, Minimizing validation test ware development costs, Recommendation. Measurements: Useful and other interesting measures, Recommendations	**8 Hrs**
	Unit – III	
7	**Chapter 7: Testing tasks, Deliverables and Testing tools.** Testing tasks, deliverables, & chronology, Master test planning ,Verification testing tasks and deliverables, Validation testing tasks and deliverables, A testing orphan.Software testing tools: Categorizing testing tools, Tool acquisition.	**4 Hrs**
8	**Chapter 8: Managing Testing Technology** Organization approach to testing: Organizing and Reorganizing testing, Structural design elements, Approach to organizing the test functions, Selecting the right approach: Current practice, trends, challenges, GUIs: What is new here, Usage testing, tester to developer ratios, Software measures and practices benchmark study, Getting sustainable gains, Getting gains to happen, getting help, follow up, Standards relevant to software engineering and testing, Verification check lists.	**4 Hrs**

Text Book:

1. Brian W. Kernighan and Rob Pike: The practice of programming, Addison-Wesley, 1999.
2. Edward kit: Software testing in the Real World,Addison-Wesley,1995

Activities		
#	TOPICS	ACTIVITY
1	Software Practice- I	• **Practice of Programming** Example Naming style, Expression and statements usage. • **Usage** of Function Macros. • **Proper usage** of Comments in the programming. • **Working** with CSV, Prototype libraries. • Designing user interface (Case study)
2	Software Practice- II	• **Working** with different types of Algorithms like Searching, Sorting. • **Working** with different types of Data structures like Growing Arrays, List, Trees, Hash table. • **Design and Implementation** of Markov Chain algorithm.
3	Software Practice- III	• **Identifying** algorithm performance and improving algorithm performance by rewriting. • **Usage** of Timing and Profiling like Time in UNIX, Clock in C language. • **Practice** on tuning the code.

4	Software Practice- IV	• **Identifying** right language for given task. • **Working** on Programmable tools like Shell, AWK. • **Using** Macros to generate the code. • **Working** with Debugging tools.
5	Six Essentials of Software Testing	• **Understanding** Essentials of Software testing.
6	Testing method	• **Verification** testing method like Inspections, Walkthroughs, and Buddy checks practice on case study. • **Installing** Gtest and JUnit testing framework. • **Designing** test cases for given problem.
7	Testing tasks, Deliverables and Testing tools.	• **Installing** selenium automation testing tool • **Working** with selenium testing tool
8	Managing Testing Technology	• **Understanding** organization approach for testing. • **Selecting** right approach while testing. • **Working** with GUI design.

Evaluation Scheme

1.   In Semester Assessment (ISA)

Assessment	Marks
ISA	**100**
ESA	**---**
Total	**100**

.

Course Code: **21ECAE811**	Course Title: **Virtual Reality Systems**	
L-T-P: **3-0-0**	Credits: 3	Contact Hrs: 3
ISA Marks: **100**	ESA Marks: **--**	Total Marks: **100**
Teaching Hrs: **40**		Exam Duration:**3Hrs**

No	Content	Hrs
	Unit I	
1	**Chapter 1 : Virtual Reality and Virtual Environment and The Historical Development of VR** Introduction, Computer graphics, Real-time computer graphics, Flight Simulation, Virtually environments, Virtually here, What is required?, The benefit of virtual reality, Historical Development of VR: Introduction, Scientific landmarks.	4 Hrs
2	**Chapter 2: 3D Computer Graphics** Introduction, The virtual world space, Positioning the virtual observer, The perspective projection, Human vision, Stereo perspective projection, 3D clipping, Color theory, Simple 3D modelling, Illumination models, Reflection models, Shading algorithms, Radiosity, Hiddeny-surface removal, Realism, Stereographic image	4 Hrs
3	**Chapter 3: Geometric Modelling and Geometric Transformations** Introduction, From 2D to 3D, 3D space curves, 3D boundary representation, Other Modelling Strategies, Frames of reference; Geometric Transformations: Introduction, Frames of reference, Modelling Transformations, Instances, Picking, Flying, Scaling the VE, Collision Detection.	4 Hrs
4	**Chapter 4: A generic VR System** Introduction, The virtual environment, The computer Environment, VR technology, Modes of Interaction, VR systems.	4 Hrs
	Unit II	

	FORM ISO 9001: 2015- KLE TECH Department of Master of Computer Applications	**Document #:** **FMCD2005**	**Rev: 1.1**
Curriculum Content- Course wise		**Page 101 of 107**	
		Year: 2021-23	

5	**Chapter 5 : Interacting with the Virtual World** User Interface Metaphors-Key Interactions: Manipulation, Navigation, and Communication, Manipulating a Virtual World-Manipulation Methods, Properties of Manipulation, Selection, Manipulation Operations, Manipulation Summary, Navigating in a Virtual World-Wayfinding, Trave, Navigation Summary, Interacting with Others-Shared Experience Collaborative Interaction, Interacting with the VR System (Metacommands)	**8 Hrs**
6	**Chapter 6: The Virtual Reality Experience** Immersion-Physical/Sensory Immersion, Mental Immersion The Role of Realism in Immersion Point of View Venue, Rules of the Virtual World: Physics- Types of Virtual World Physics, User Interaction with the World Physics, Simulation/Mathematical Model, Object Co-Interaction, World Persistence, Interference from the Physics of the Real World, Substance of the Virtual World - World Geography, Objects, Agents, User Interface Elements	**8 Hrs**
	Unit – III	
7	**Chapter 7: Experience Design. Applying VR to a Problem** Will VR Meet Your Goals? - Is VR the Appropriate Medium?, Creating a VR Application - Adapting from Other Media, Adapting from an Existing VR Experience, Creating a New VR Experience, Designing a VR Experience- Design Deliberately, Design with the System in Mind, Design with the Venue in Mind, Design with the Audience in Mind, Consider Design Tradeoffs, Design the User Objective, Design the End of the Experience, Document, Deploy, and Evaluate the Experience, The Future of VR Design	**4 Hrs**
8	**Chapter 8: The Future of Virtual Reality** The State of VR - Technology Trigger, Peak of Inflated Expectations, Trough of Disillusionment, Slope of Enlightenment, Plateau of Productivity, The Field of VR Research, Trends, Technology Futures - Display Technologies, Input Technologies, Software - Hardware Interface Software, Application Development Software, Application Futures	**4 Hrs**

Text Book:

1. John Vince, Virtual Reality Systems , Pearson, 2002
2. William R. Sherman, Alan B. Craig, Understanding Virtual Reality, Inteface, Application and Design, MORGAN KAUFMANN PUBLISHERS, 2003

Activities

#	TOPICS	ACTIVITY
1	**Getting Started**	Demonstrate the following: ● The Dashboard interface

	FORM	Document #: FMCD2005	Rev: 1.1
	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		

Curriculum Content- Course wise	Page 102 of 107
	Year: 2021-23

		● Creating a new scene ● The Sumerian editor interface
2	**Amazon Sumerian Basics: Create your first scene**	Learn and accomplish the following: ● Create a room with primitive entities (Box) ● Cover lighting basics ● Import entities from the asset library ● Place and move objects ● Create interactive behaviors using the State Machine ● Add basic animations
3	**State Machine Basics**	Build **behaviors**, using a collection of **States** that are connected by **Transitions**, as an entity transitions from one state to another.
4	**Events Basics**	Create a simple action to rotate a *Box* entity when we click a *Sphere*.

5	**Timeline Basics**	Animate a drone to fly around a large sphere using the **Timeline** and **Keyframes**. The **Timeline** enables you to create animations and movements for scene entities. You can also trigger them by actions you set in the **State Machine**.
6	**Importing third Party Assets**	Import asset bundles that consist of multiple files by dragging and dropping them onto the canvas. Using this capability, you can import .obj files, .mtl files, meshes, materials, and textures using a single drag and drop.
7	**Material Fundamentals using the Classic Shader**	Demonstrate the concepts of adding Textures and optimizing the Material component by working with sphere Primitives.

No	Content	Hrs
	Unit I	
1	**Chapter 1 : Introduction to Internet of Things (IoT)** Definition & Characteristics of IoT, Physical Design of IoT: IoT protocols, Logical Design of IoT: IoT functional blocks, communication models and APIs.	**6 Hrs**
2	**Chapter 2 : IoT Enabling Technologies** Wireless Sensor Networks, Cloud Computing, Big Data Analytics, Communication Protocols, Embedded Systems, IoT Levels and Deployment Templates.	**5 Hrs**
3	**Chapter 3 : Domain specific IoTs** Home Automation ,Cities, Environment ,Energy, Retail, Logistics, Agriculture, Industry, Health and Lifestyle.	**5 Hrs**
	Unit II	
4	**Chapter 4 : IoT Platforms Design Methodology** IoT Design Methodology, Case Study on IoT System for Weather Monitoring.	**4 Hrs**
5	**Chapter 5 : IoT systems – Logical design using Python** Introduction to Python, Data types, data structures, Control of flow, functions modules, packages, file handling, data/time operations, classes, Python packages - JSON, XML, HTTPLib, URLLib, SMTPLib.	**5 Hrs**
6	**Chapter 6 : IoT Physical Devices and Endpoints** Basic building blocks of an IoT device, Exemplary device: Rasyberry Pi, interface (serial, SPI, I2C), Programming Rasyberry Pi with Python.	**7 Hrs**
	Unit III	
7	**Chapter 7 : IoT Physical Servers & Cloud Offerings** Introduction to Cloud Storage models and communication APIs ,Webserver – Web server for IoT, Cloud for IoT, Python web application framework, Designing a RESTful web API	**4 Hrs**

	FORM	**Document #:**	**Rev: 1.1**
	ISO 9001: 2015- KLE TECH	**FMCD2005**	
	Department of Master of Computer Applications		

Curriculum Content- Course wise	**Page** 104 **of** 107
	Year: 2021-23

8	**Chapter 8 : Case Studies Illustrating IoT Design**	**4 Hrs**
	Home Automation-smart lighting, home intrusion detection, Cities-smart parking.	

Text Book:

1. Arshdeep Bahga and Vijay Madisetti, "Internet of Things - A Hands-on Approach" Universities Press, 2015.

References:

2. Matt Richardson & Shawn Wallace, "Getting Started with Raspberry Pi", O'Reilly (SPD), 2014.

Activities

#	TOPICS	ACTIVITY
1	**Introduction to Internet of Things (IoT)**	Presentation on IoT.
2	**Domain specific IoTs**	Presentation on IoT applications.
3	**IoT systems – Logical design using Python**	Exploring & practicing Python libraries for interfacing with IoT devices like Aurdino, Raspberry Pi and sensors.
4	**IoT Physical Devices and Endpoints & IoT Physical Servers & Cloud Offerings**	1. Easy Motion and Gesture Detection by PIR Sensor. 2. Soil Moisture Sensor using moisture sensor. 3. Humidity and Temperature Monitoring System using DTH sensor. 4. Remote for TV. 5. Color Recognition system. 6. Connecting all the systems with free cloud services like Thinkspeak, Blink Android app.
5	**IoT Design**	Case study on Home Automation.

Activities

#	TOPICS	ACTIVITY
1	**Mobile Computing Through Telephony**	Implement respond to incoming SMS messages using Twilio library or any other similar services. https://www.twilio.com/docs/sms
2		Build an Interactive Voice Response (IVR) Phone Tree
3		Implement missed call service for your business using cloud telephony network https://www.ivrguru.com/missed-call-number-services
4	**Emerging Technologies.**	Design and Implement RFID-Based Information System
5		Implement Blue Tooth Application by using android Bluetooth API's in android applications to perform the following functionalities. ● Scan for the available Bluetooth devices within the range ● Use local Bluetooth adapter for paired Bluetooth devices ● Connect to other devices through service discovery ● Transfer data to and from other devices ● Manage multiple connections
6		Design a location tracking App using GPS in Android Studio.

ISA: In Semester Assessment, **ESA:** End Semester Assessment, **L:** Lecture **T:** Tutorials **P:** Practical,

PSC: Program Scheme Core, **HSC:** Humanities Scheme Core, **BS**: Basic Science **PSE**: Program Scheme Elective.

Guidelines for Elective III & IV Enrollment & Completion

1. The student has the provision to enroll for certification, elective 3 & 4 courses during 1st year summer vacation and complete by IV semester.
2. The student is allowed to choose the courses from the list of Certification & MOOC courses approved by the department.
3. The evaluation of certification, Electives 3 & 4 courses is conducted during the course as per the In Semester Assessment (ISA) rubrics.
4. The certification course has to of minimum 10 hours.
5. The certification course can be from any learning platform like Coursera, Udemy, Swayam, W3Schools and alike. It can be a Value-Added Course from any educational institution.
6. ISA rubrics includes Seminar, Programming assignment, and Quiz.

Course Code: **20ECAC701**		Course Title: **Data Structures using C**	
L-T-P: **4-0-2**	Credits: 6		Contact Hrs: **8**
ISA Marks: **50**	ESA Marks: **50**		Total Marks: **100**
Teaching Hrs: **50+48**			Exam Duration:**3Hrs**

No	Content	Hrs
	Unit I	
1	**Chapter No. 1 : Overview of C** History of C, Features of C, Why to learn C Programming, Basic structure of a C program, Compilation Process in C, Compile time Vs Runtime, Variables, Constants, ASCII value, Data Types, Storage Classes, Operators, Decision Making, Loops, Functions, Scope Rules, Passing arrays to functions, Passing structures to Functions, Character arrays, Pointers, malloc(), calloc(), realloc() and free() functions in C	**10 Hrs**
2	**Chapter No.2: Stacks** Definition and examples, Primitive operations, Example, Representing stacks in C, Implementing the pop operation, Testing for exceptional conditions, Implementing the push operation, Examples for infix, postfix, and prefix expressions, Basic definition and examples, Program to evaluate a postfix expression, Converting an expression from infix to postfix, Program to convert an expression from infix to postfix.	**5 Hrs**
3	**Chapter No. 3: Recursion** Recursive definition and processes, Factorial function, Multiplication of natural numbers, Fibonacci sequence, Binary search, Properties of recursive definition or algorithm. Recursion in C, Factorial in C, Fibonacci numbers in C, Binary search in C, Towers of Hanoi problem	**5 Hrs**
	Unit II	
4	**Chapter No. 4 : Queues and Lists** The queue and its sequential representation, C implementation of queues, Insert operation, Priority queue, and array implementation of a priority queue. Linked lists, Inserting and removing nodes from a list, Linked implementation of stacks, get node and free node operations, Linked implementation of queues, Linked list as a data structure, Example of list operations, Header nodes, Lists in C, Array implementation of lists, Limitations of array implementation, allocating and freeing dynamic variables, Linked lists using dynamic variables, Queues as lists in C, Examples of list operations in C, Non integer and non- homogeneous lists, Other list structures: Circular lists, Stack as a circular list, Queue as a circular list, Primitive operations on circular lists, doubly linked lists	**10 Hrs**
5	**Chapter No. 5: Trees and Graphs** Binary trees, operations on binary trees, Applications of binary trees, Binary tree representation, Node representation of binary tree, Internal and external nodes, Implicit	**10 Hrs**

	FORM	**Document #:** **FMCD2005**

Schemas *

i)Student-Enrollment Database.

Consider the following relations:

Student(snum: integer, sname: string, major: string, level: string, age: integer)

Class(name: string, meets at: string, room: string, fid: integer)

Enrolled(snum: integer, cname: string)

Faculty(fid: integer, fname: string, deptid: integer)

Enrolled has one record per Student-class pair such that the student is enrolled in the class.

Write the following queries in SQL.

1. Create the above tables by properly specifying all the integrity constraints.

2. Insert at least five tuples into each table.

3. Find the names of all Juniors (level=JR) who are enrolled in a class taught by I.John.

4. For each level, print the level and the average age of students for that level.

5. Find the names of students not enrolled in any class.

ii) Insurance Database.

Consider the insurance database given below.

PERSON (driverid: String, name: String, address: String)

CAR (regno: String, model: String, year: Int)

ACCIDENT (repno: Int, dat: Date, location: String)

OWNS (driverid: String, regno: String)

PARTICIPATED (driverid: String, regno: String, repno: Int, damageamt: Int)

 Write the following queries in SQL.

1. Create the above tables by properly specifying the integrity constraints.

2. Enter at least five tuples for each relation.

3. Demonstrate how you

* Update the damage amount for the car with a specific Regno in the accident with report number 12 to 25000

* Add a new accident to the database

4. Find the total number of people who owned cars that were involved in accidents in 2002.

5. Find the number of accidents in which cars belonging to a specific model were involved.

iii)Company Database:

- The company is organized into departments. Each department has a unique name, a unique number, and a particular employee who manages the department. We keep track of the start date when that employee began managing the department. A department may have several locations.
- A department controls a number of projects, each of which has a unique name, a unique number, and a single location.
- We store each employee's name, Social Security number, address, salary, gender) and birth date. An employee is assigned to one department, but may work on several projects, which are not necessarily controlled by the same department. We keep track of the current number of hours per week that an employee works on each project. We also keep track of the direct supervisor of each employee (who is another employee).
- We want to keep track of the dependents of each employee for insurance purposes. We keep

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		

Curriculum Content- Course wise	**Page** 17 **of** 108
	Year: 2021-23

each dependent's first name,gender,birth date,and relationship to the employee.

Write the following queries in SQL for the Company database

1. To display the details of all the Employee whose first name starts with "S".
2. To display name and address of all employee who work for "MCA" department.
3. To display the names of employee who do not have supervisor.
4. To retrieve First name and salary of all employees in department 5 whose salary is between Rs.30,000 and 40,000.
5. For each department , to retrieve the department number, the number of employees in that department and their average salary.

iv)Movie Database

Movie Database. Data requirements of movie industry are captured.

•Each movie is identified by title and year of release. Each movie has length in minutes and classified under one genres (like action, horror etc.). Each movie has a plot outline.

•Production companies are identified by name and each has an address. A production company produces one or more movies.

•Actors are identified by id. Other details like name and date of birth of actors are also stored. Each actor acts in one or more movies. Each actor has a role in movie.

•Directors are identified by id. Other details like name and date of birth of directors are also stored. A Director can act in a movie (including the one that he or she may also direct). Each director directs one or more movies.

•Each movie has one or more actors and one or more directors and is produced by a production company.

Solve the following queries in SQL:-

a. List the details of horror movies released in 2012 and directed by more than 2 directors.

b. List the details of actors who acted in movies having same titles but released before 2000 and after 2010.

c. List the details of production companies producing maximum movies.

d. List the details of movies where director and actor have same date of birth.

e. Retrieve the names of directors directed all the movies produced by any one production company.

Activities

Implement the following programs using C programs.

#	TOPICS	ACTIVITY

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
	ISO 9001: 2015- KLE TECH		
	Department of Master of Computer Applications		
Curriculum Content- Course wise		Page 23 of 108	
		Year: 2021-23	

1	**UNIX Commands System Calls.**	Program to simulate Unix commands and System calls.
2	**Process Management and Scheduling**	Program to simulate the following non-preemptive CPU scheduling algorithms to find turnaround time and waiting time. a) FCFS b) SJF c) Round Robin (pre-emptive) d) Priority
3		Program to simulate multi-level queue scheduling algorithm considering the following scenario. All the processes in the system are divided into two categories – system processes and user processes. System processes are to be given higher priority than user processes. Use FCFS scheduling for the processes in each queue.
4	**Process Synchronization**	Program to simulate and Producer Consumer Problem using semaphores
5		Program to simulate Dining Philosopher's problem
6	**Memory Management Techniques**	Program to simulate the following contiguous memory allocation techniques a) Worst-fit b) Best-fit c) First-fit
7		Program to simulate paging technique of memory management.
8	**Deadlock Avoidance**	Program to implement Banker's algorithm.
9	**Disk Scheduling**	Program to simulate disk scheduling algorithms a) FCFS b) SCAN c) C-SCAN
10	**Page replacement algorithms**	Simulate the following page replacement algorithms: FIFO,LRU and Optimal

No	Content	Hrs
	Unit I	
1	**Chapter 1 : Fundamentals of Web** A Brief Introduction to the Internet, The World Wide Web, Web Browsers, Web Servers, Uniform Resource Locators, The Hypertext Transfer Protocol, Security, The Web Programmer's Toolbox.	**5 Hrs**
2	**Chapter 2 : HTML** Origins and Evolution of HTML , Standard HTML Document Structure, Basic Text Markup, Images, Hypertext Links, Lists, Tables, Forms, Audio and Video elements, Syntactic Differences between HTML and XHTML.	**5 Hrs**
3	**Chapter 3 : CSS and Bootstrap** Levels of Style Sheets, Style Specification Formats, Selector Forms, Property-Value Forms, Properties of Font and List, Alignment of Text, The Box Model, Background Images, The span and div Tags, Conflict Resolution, Bootstrap buttons, panels, alerts and themes.	**5 Hrs**
	Unit II	
4	**Chapter 4 :Dynamic documents and JavaScript** The JavaScript Execution Environment, Element Access in JavaScript, Events and Event Handling, Handling Events from Body, Button, Text Box and Password Elements, Positioning Elements, Dynamic Content, Stacking Elements, Reacting to a Mouse Click, Dragging and Dropping Elements.	**5 Hrs**

	FORM ISO 9001: 2015- KLE TECH Department of Master of Computer Applications	**Document #:** **FMCD2005**	**Rev: 1.1**
Curriculum Content- Course wise		**Page** 25 **of** 108	
		Year: 2021-23	

5	**Chapter 5: PHP Programming** History, Unique features, Basic development concepts, Creating your first PHP script, Writing & running the script, Understanding the scripts, Handling script errors, Storing data in variables, Understanding PHP's data types, Setting & checking variable data types, Using constant and Manipulating variables with operators, Handling form input and conditional statements, Processing arrays with loops & iterators, Creating user defined function, Creating classes, Using Advanced OOP concepts.	**10Hrs**
	Unit – III	
6	**Chapter No. 6. Working with databases & SQL** Introducing databases & SQL, Using PHP MySQLi extension, Adding or modifying data, Handling errors, Building a Login form.	**5 Hrs**
7	**Chapter 7: Working with Cookies, Sessions & Headers** Working with Cookies ,Cookie Basics , Cookie Attributes , Cookie Headers ,Setting Cookies ,Reading Cookies , Removing Cookies, Working with Sessions , Session Basics , Creating Sessions and Session Variables , Removing Sessions and Session Variables, Using HTTP headers.	**5 Hrs**

(KLE TECH logo)	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise			**Page** 38 **of** 108
			Year: 2021-23

	Azure and online services; open-source software platforms for private clouds; Cloud storage diversity and vendor lock-in; Cloud computing interoperability: the intercloud; Energy use and ecological impact of large-scale data centers; Service and compliance level agreements; User experience; Software licensing.	
3	**Chapter 3: Cloud Computing: Applications and Paradigms**	**4**
	Challenges for cloud computing; Existing cloud applications and new application opportunities; Architectural styles for cloud applications; Workflows: Coordination of multiple activities; The MapReduce programming model; Case studies.	
	Unit II	
4	**Chapter 4: Cloud Resource Virtualization**	**6**
	Virtualization; Layering and virtualization; Virtual machine monitors; Virtual machines; Performance and security isolation; Full virtualization and Para virtualization; Hardware support for virtualization; Case study; Optimization of network virtualization; vBlades; A performance comparison of virtual machines; Software fault isolation;	
5	**Chapter 5: Cloud Resource Management and Scheduling**	**6**
	Policies and mechanisms for resource management; Applications of control theory to task scheduling on a cloud; Stability of a two-level resource allocation architecture; Feedback control based on dynamic thresholds; Coordination of specialized autonomic performance managers; A utility-based model for cloud-based web services; Resource bundling; Scheduling algorithms for computing clouds; Fair queuing; Resource management and dynamic application scaling.	
6	**Chapter 6: Networking Support**	**4**
	Packet-switched networks; The Internet; Internet migration to IPV6; The transformation of the Internet; Web access and the TCP congestion control window; Network resource management; Interconnection networks for computer clouds; Content-delivery networks; Overlay networks and small-world networks.	
	Unit – III	
7	**Chapter 7: Storage Systems**	**4**
	The evolution of storage technology; Storage models, file systems and databases; Distributed file systems: The precursors; General parallel file system; Google File System; Apache Hadoop; Locks and Chubby: A locking service; Transaction processing and NoSQL and databases; BigTable; Megastore.	
8	**Chapter 8: Cloud Security**	**4**
	Cloud security risks; Security: The top concern for cloud users; Privacy and privacy impact assessment; Trust; Operating system security; Virtual machine security; Security of virtualization; Security risks posed by shared images; Security risks posed by a management OS; A trusted virtual machine monitor.

ACTIVITIES

#	TOPICS	ACTIVITY	WEIGHTAGE
1	Introduction, Parallel and distributed systems	Compare the three cloud computing delivery models, SaaS, PaaS, and IaaS, from the point of view of the application developers and users. Discuss the security and the reliability of each one of them. Analyze the differences between the PaaS and the IaaS. An IT company decides to provide free access to a public cloud dedicated to higher education. Which one of the three cloud computing delivery models, SaaS, PaaS, or IaaS should it embrace and why? What applications would be most beneficial for the students? Will this solution have an impact on distance learning? Why? What is in your opinion the critical step in the development of a systematic approach to all-or-nothing atomicity? What does a systematic approach means? What are the advantages of a systematic versus an ad-hoc approach to atomicity?	15
2	Cloud Infrastructure	Several desirable properties of a large-scale distributed system includes transparency of access, location, concurrency, replication, failure, migration, performance, and scaling. Analyze how each one of these properties applies to AWS. Demonstration Cloud services using AWS or Azure or Google Cloud. Compare the Oracle Cloud offerings (see https://cloud.oracle.com) with the cloud services provided by Amazon, Google, and Microsoft.	15
3	Cloud Computing: Applications and Paradigms	Download and install the Zookeper from the site http://zookeeper.apache.org/. Use the API to create the basic workflow patterns or Use the AWS CloudFormation service to create the basic workflow patterns. Search the web for reports of cloud system failures and discuss the causes of each incident.	10

KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications	**FMCD2005**	**Rev: 1.1**

Curriculum Content- Course wise	**Page** 40 **of** 108
	Year: 2021-23

		Research the power consumption of processors used in mobile devices and their energy efficiency. Rank the components of a mobile device in terms of power consumption. Establish a set of guidelines to minimize the power consumption of mobile applications.	
4	Cloud Resource Virtualization	Virtualization simplifies the use of resources, isolates users from one another, supports replication and mobility, but exacts a price in terms of performance and cost. Analyze each one of these aspects for: (i) memory virtualization, (ii) processor virtualization, and (iii) virtualization of a communication channel. Virtualization of the processor combined with virtual memory management pose multiple challenges; analyze the interaction of interrupt handling and paging. In Section 5.6 we state that a VMM for a processor can be constructed if the set of sensitive instructions is a subset of the privileged instructions of that processor. Identify the set of sensitive instructions for the x86 architecture and discuss the problem each one of these instruction poses.	15
5	Cloud Resource Management and Scheduling	Analyze the benefits and the problems posed by the four approaches for the implementation of resource management policies: control theory, machine learning, utility based, market-oriented. Can optimal strategies for the five classes of policies, admission control, capacity allocation, load balancing, energy optimization, and QoS guarantees be actually implemented in a cloud? Support your answer with solid arguments. Multiple controllers are probably necessary due to the scale of the cloud. Is it beneficial to have system and application controllers? Justify your answers.	15
6	Networking Support	Implementation Simple IPC (Client Server Communication) Simple chat server multi-threaded File Server	10
7	Storage Systems	Analyze the reasons for the introduction of storage area networks (SANs) and their properties. Block virtualization simplifies the storage management tasks in SANs. Provide solid arguments in support of this statement. The designers of the Google file system (GFS) have re-examined the traditional choices for a file system. Discuss	10

Linux Administration Practices

COURSE DESCRIPTION:

IT infrastructure consists of a set of physical devices and software applications that are required to operate the entire enterprise. IT infrastructure is also consists both human and technical capabilities. These services include the following- Computing platforms used to provide computing services, that connect employees, customers, and suppliers into a coherent digital environment, including servers ,Data management services that store and manage corporate data and provide capabilities for analyzing the data and Application software services that provide enterprise-wide capabilities such as enterprise resource planning, customer relationship management, supply chain management, and knowledge management systems that are shared by all business units. It allows an organization to deliver IT solutions and services to its employees, partners and/or customers and is usually internal to an organization and deployed within owned facilities.

OBJECTIVES

o Acquire comprehensive knowledge, technical expertise and hands-on experience in IT Infrastructure Management
o To learn all aspects of IMS such as Networking, Operating Systems, Virtualizations and Data Center technologies.

LAB REQUIREMENTS:

o A modern web-browser with HTML5 and JavaScript enabled.
o Remote Desktop Client connection software.
o Internet connectivity Microsoft Account (LiveID).

LIST OF EXERCISES

#	Topics	ACTIVITY	WEIGHTAGE
1	Web Server	Apache Web Server, IIS Server: Install and Configure the Apache Web Server on Linux and IIS server on windows.	10
2	Samba Server	Implementation of Windows files and print services for Linux allowing the sharing of files and printers between Windows and Linux.	10

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		
Curriculum Content- Course wise			**Page** 58 **of** 108
			Year: 2021-23

3	LDAP Server	LDAP Server: Lightweight Directory Access Protocol- Server Installation to access a directory service.	10	
4	Mail Server	Mail Server configuration- POP3 Server, IMAP Server	10	
5	Proxy Server	Develop a small web proxy server, which is able to cache web pages. It is a very simple proxy server which only understands simple GET-requests, but is able to handle all kinds of objects - not just HTML pages, but also images.	10	
6	Firewalls and NAT (Network Address Translation)	Use of iptables to build a permissive firewall by selectively filtering packets based on protocol type. To demonstrate how addresses may be translated from private addresses to public and vice versa as they pass in and out of the firewall.	20	
7	Cloud Infrastructure: Azure Hands-on Build your Infrastructure in the Cloud using Windows Azure Infrastructure Services -	1. Login to the Windows Azure Management Portal, Define a new Windows Azure Affinity Group and Create a new Windows Azure Storage Account. 2. Register a DNS Server in Windows Azure. 3. Define a Virtual Network in Windows Azure. 4. Configure Windows Server Active Directory in a Windows Azure VM. 5. Configure New Machine for File Services in a Windows Azure VM.	30

Curriculum Content- Course wise	**Page** 60 **of** 108
	Year: 2021-23

4	**Chapter 4 : Everything is Code** The need for source code control,The history of source code management, Roles and code, Which source code management system? A word about source code management system migrations, Choosing a branching strategy, Branching problem areas, Artifact version naming, Choosing a client, Setting up a basic Git server, Shared authentication, Hosted Git servers, Large binary files, Trying out different Git server implementations, Docker intermission, Gerrit : a) Installing the git-review package, b)The value of history revisionism, The pull request model, GitLab.	**5 Hrs**
	Unit II	
5	**Chapter 5 : Building the Code** Why do we build code? The many faces of build systems, The Jenkins build server, Managing build dependencies, The final artifact, Cheating with FPM, Continuous Integration, Continuous Delivery, Jenkins plugins, The host server, Build slaves, Software on the host, Triggers, Job chaining and build pipelines, A look at the Jenkins filesystem layout, Build servers and infrastructure as code, Building by dependency order, Build phases, Alternative build servers, Collating quality measures, About build status visualization, Taking build errors seriously, Robustness.	**3 Hrs**
6	**Chapter 6 : Testing the Code** Manual testing, Pros and cons with test automation, Unit testing, JUnit in general and JUnit in particular, A JUnit example, Mocking, Test Coverage, Automated integration testing, Docker in automated testing, Arquillian, Performance testing, Automated acceptance testing, Automated GUI testing, Integrating Selenium tests in Jenkins, JavaScript testing, Testing backend integration points, Test-driven development, REPL-driven development, A complete test automation scenario : Manually testing our web application, Running the automated test, Finding a bug, Test walkthrough, Handling tricky dependencies with Docker.	**3 Hrs**
7	**Chapter 7 : Deploying the Code** Why are there so many deployment systems? Configuring the base OS, Describing clusters, Delivering packages to a system, Virtualization stacks: Executing code on the client, A note about the exercises, The Puppet master and Puppet agents, Ansible, Deploying with Chef, Deploying with SaltStack, Salt versus Ansible versus Puppet execution models, Vagrant, Deploying with Docker, Comparison tables, Cloud solutions, AWS, Azure.	**5 Hrs**
8	**Chapter 8 : Monitoring the Code** Nagios, Munin, Ganglia, Graphite, Log handling, Client-side logging libraries, The ELK stack.	**5 Hrs**
	Unit – III	
9	**Chapter 9 : Issue Tracking** What are issue trackers used for? Some examples of workflows and issues, What do we need from an issue tracker? Problems with issue tracker proliferation, All the trackers : Bugzilla, Trac, Redmine, The GitLab issue tracker, Jira**.**	**4 Hrs**
10	**Chapter 10 : The Internet of Things and DevOps** Introducing the IoT and DevOps, The future of the IoT according to the market, Machine-to-machine communication, IoT deployment affects, software architecture, IoT deployment security, Okay, but what about DevOps and the IoT again?, A hands-on lab with an IoT device for DevOps.	**4 Hrs**

Page 62 of 108

Year: 2021-23

2.	**AWS crash course:** Hands-on session where you learn to use the most important AWS services, including IAM, EC2, ASG, EBS, ELB, S3, and RDS.	Lab Practice, Assignment and Quiz	10
3.	**Infrastructure as code**: Overview of different techniques to manage infrastructure, including ad-hoc scripts (e.g., Bash, Python), configuration management tools (e.g., Chef, Puppet), machine images (e.g., VMs, Docker), and provisioning tools (e.g., Terraform, CloudFormation).	Lab Practice, Assignment and Quiz	10
4.	**Terraform introduction**: Go through a series of coding exercises that cover the basic Terraform syntax, state management, loops, conditionals, lifecycle management, and common gotchas.	Lab Practice, Assignment and Quiz	10
5.	**Advanced Terraform**: Go through a series of coding exercises that cover Terraform modules, file layout, keeping code DRY, team workflows, and automated testing.	Lab Practice, Assignment and Quiz	10
6.	**Immutable infrastructure:** Overview of immutable infrastructure practices, versioning artifacts, promoting artifacts through environments, and deployment.	Lab Practice, Assignment and Quiz	10
7.	**Packer introduction:** Build your own AMIs and other virtual machine images using Packer. **Docker introduction**: Create your own Docker images and deploy them using Docker orchestration tools.	Lab Practice, Assignment and Quiz	10
8.	**DevOps best practices**: Learn about continuous integration, micro services, feature toggles, canary deployments, monitoring, alerting, and log aggregation.	Lab Practice, Assignment and Quiz	10
9.	**Production readiness review:** A Gruntwork engineer goes through a checklist of questions with your team to see what work you need to do to be ready for prod. **Architecture deployment:** Deploy your customized Reference Architecture in AWS.	Lab Practice, Assignment and Quiz	10
10.	**Migrating to the new architecture:** Learn the process of migrating your apps and data to the new architecture.	Lab Practice, Assignment and Quiz	10
		Total	**100**

User Interface Design Practices		
Sl.No	**Activity**	**Weightage**
1	Find two examples of user interfaces (might be desktop software, web applications, smartphone apps, consumer devices, car dashboards, building entrances, traffic intersections, shower controls, etc), one that you consider a good design and one that you consider a bad design. For each interface, you should: ● Describe its purpose for intended users. ● Analyze its good and bad points of usability with reference to all the dimensions of usability (learnability, visibility, efficiency, errors) Illustrate your analysis with appropriate screenshots or photographs.	5
2	Design a user interface for a specific task that communicates its conceptual model to the user more effectively, so that users are less likely to make this mistake. Sketch your ideas (alternate designs) on a whiteboard. Critique it, and update the designs.	5
3	Guided by the categories below, make a list of what needs to be made visible, and then brainstorm (and sketch) how the interface might make it visible. ● Actions: what can the user do? ● State: what is the current state of the system? ● Feedback: what was the effect of the user's actions	5

FORM	Document #: FMCD2005	Rev: 1.1
ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		

Curriculum Content- Course wise	Page 68 of 108
	Year: 2021-23

4	Explore the undo models used in single-user text editing. Choose a few different kinds of textboxes. Experiment with a web browser's undo model for text editing by typing, deleting, changing properties, and using Undo. Try to figure out: ● How many undo streams are there—one, or many? ● How is the history divided into undoable units? ● How much previous state is recovered when you undo? (Selections? cursor positions?) ● What visible feedback does Undo give? (e.g., if the Undo affects a location scrolled out of the box?)	5
5	User-centered design process, by conducting a lightweight UCD process on a few problems in the classroom.	10
6	User Analysis, Task Analysis, Domain Analysis by observing a real environment of people working.	10
7	Designing UIs by sketching.	10
8	Exploring some of the main structuring patterns of GUI software: the view tree, listeners, and model-view-controller using HTML, Javascript, and jQuery, along with a handy online HTML editor.	10
9	Explore low-fidelity prototyping by creating a simple, hand-drawn prototype in less than 5 minutes, and simulating it with another user.	10
10	Information visualization by experimenting with modifications to an existing visualization using a browser.	10
11	Exploring some of the principles and pitfalls of color design and typography.	10
12	Heuristic evaluation of an e-commerce web site. Record the usability problems found. Justify every observation by naming one or more usability heuristics (design principles) that it violates. Assign a severity rating to each problem (cosmetic, minor, major, or catastrophic). Include at least one positive usability comment, again justifying it by naming one or more heuristics.	10

WEB CONTENT MANAGEMENT SYSTEM – COURSE PROJECT

COURSE DESCRIPTION:

Today, many web publishers use content management systems (CMS) to allow them to instantly and dynamically update web pages and properties as new content becomes available so that every visit to a site is engaging, informative, and meaningful. The course project shall explore any one of

	FORM	**Document #:**	
KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications	**FMCD2005**	**Rev: 1.1**

Curriculum Content- Course wise	**Page** 70 **of** 108
	Year: 2021-23

the three most popular open source web-based content management systems—**WordPress, Joomla, and Drupal**—to create dynamic and flexible websites and landing pages. Students shall explore the fundamentals of planning dynamic websites, CMS database management, developing CSS-controlled site templates, and creating database-driven websites through the planning and creation of their own topic-based sites.

OBJECTIVES
- Introduce learners to any one of the three most popular open source content management systems (CMS) such as WordPress, Drupal, or Joomla.
- Create, deploy and Maintain websites using CMS, including creating and editing content, adding functionality, and creating custom templates and themes.

COURSE PROJECT TITLE: BUILDING WEBSITE USING CMS (JOOMLA / WORDPRESS OR DRUPAL)

To build website for any real world examples such as Corporate web sites or portals, Online magazines, newspapers, and publications, E-commerce and online reservations, Government applications,   Small business web sites, Community-based portals, School, religious web sites or Personal or family homepages using popular Web Content Management System. The website shall facilitate to create, manage, store and deploy content on the Web, including text, graphics, video or audio as a part of Enterprise Content Management.

EXECUTION PLAN:

Sl.No	Demonstration	Implementation	Weightage
1.	**Introducing Content Management Systems** o An overview of some of the different tools and methods that today's web publishers are using to create highly-tailored dynamic web content. o Purchasing and configuring a domain name and web hosting.	1. Introduction to Joomla & Installation 2. Domain Name Registration & Configuration and Hosting 3. Create a Database 4. Content Preparation and Planning	20
2.	**Introduction to Joomla** o Explore the CAM model (Categories, Articles, and Menus) approach to creating content for Joomla environments. o Administration and management of users and media. o Installing Joomla o Exploring the Admin Interface o Content creation using the CAM model o Content customization: images, video, audio, tags, formats, etc.	1. Write an article & put your articles in order with categories. 2. Customize Administrator's Panel 3. Change your website's look with Templates. 4. Expand your website's functionality with different extensions. 5. Content creation & Customization using the CAM model	20

	FORM	**Document #:**	
KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications	**FMCD2005**	**Rev: 1.1**

Curriculum Content- Course wise	**Page** 71 **of** 108
	Year: 2021-23

3.	**Joomla Menus** ○ Creating and controlling menus for Joomla site. ○ To link to articles and create special menu items. ○ Adding and displaying menus ○ Linking menus to articles and other features	1. Categorize the articles which allow grouping your content better. 2. Create menu items for website.	20
4.	**Extending Joomla –Plug-ins, Modules** ○ Use of Joomla, Plug-ins, Modules, Components and other extensions. ○ Installation of extensions, Finding and adding Joomla extensions ○ Adding and setting up 2 "big" extensions (choose blog, calendar, image gallery, Paypal-based shopping cart, or portfolio. Other extensions on approval)	Select Create Joomla Modules for the website such as Feed Display Module, Footer Module, Latest News Module, Search Module, Random Image Module, Who's Online Module etc.	20
5.	**Custom Templates** ○ Explore the addition of creation and uses of customized Joomla templates ○ Modifying templates using CSS and HTML tricks.	Select and Customize template for website.	20
6.	**User management and permissions** ○ Explore how to manage users in Joomla site, including managing who sees what based on login, as well as who can do what based on permissions assigned.	Control the use of Captcha, registration allowed and type of registration, default user group new users, reset password, and new user registration email notice to administration.	20

Students can use the following tools in web and mobile applications as well as product developments:
- Struts, Spring, Hibernate and JPA
- Machine Learning & Deep Learning
- JAXB and Apache Axis 2/Java
- JSP, Servlets, JDBC, EJB, JMS, JTA and JUnit
- Apache Tomcat, JBoss and GlassFish
- JavaScript, JSF, GWT and jQuery
- Eclipse, Netbeans and JBoss tools
- TestNG
- jBPM and Drools
- JCR

Objectives:

	FORM	**Document #:**	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		
Curriculum Content- Course wise			**Page** 86 **of** 108
			Year: 2021-23

Help students to utilize and strengthen the knowledge of java which they have learnt in previous semester.

Methodology:

Students are asked to make a team of 3-4 members and can choose the different categories of projects like desktop applications, web applications, mobile application and distributed application and work once it is approved by the coordinator.

Assessment:

Students Assessment through CIE (50%) + SEE (50%)

Continuous Internal Evaluation	Assessment	Marks
	Problem Definition, Literature Review	05
	Synopsis and SRS Deliverables	05
	Design (Module wise algorithmic design)	10
	Coding	15
	Integration and testing	05
	Report	05
	Presentation skills and Viva-voce	05
	Total	**50**
Semester End Examination	Presentation	30
	Viva-voce	20
	Total	100

1.1   Course Objectives:

The Mini Project being part of the course work is not only a mechanism to demonstrate the abilities and specialization but also provides the opportunity to demonstrate originality, teamwork, inspiration, planning and organization in a software project. One can put into practice the techniques that have been taught throughout the previous courses. Mini-projects develop practical skills in students. The idea is to propose a problem that one might encounter in future career (be it in academia, industry, or government). Then propose a solution and implement it.

E-commerce Objectives:

Most business houses are shifting their operations to the online world. Right from buying apparels to computers to booking tickets and renting out apartments, everything can be done through the Internet now. It is a win-win formula for both the customers and the business houses. Digital India aims to boost E-business and the E-commerce industry with the vision that it would in turn boost the economy is a whole.

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise		Page 87 of 108	
		Year: 2021-23	

Multilingual Objectives:

Language is an essential driver of enterprise growth. The user interface is the key component of any application that needs to support various language speaking audiences.   Making an app that appeals to and is available for more users broadens the market and brings more revenue in the app sales and there will be more exposure to the business.

Evaluation:
- The project assessment is done by an evaluation team as per the schedule.

.

IV Semester MCA curriculum content

.

Course Code: **20ECAP802**	Course Title: **Certification (Robotics Process Automation)**	
L-T-P: **0-0-2**	Credits: **2**	Contact Hrs: **Full Time**
ISA Marks: 10**0**	ESA Marks: **--**	Total Marks: **100**
Teaching Hrs: **Full Time**		Exam Duration: **3 Hours**

The students shall undergo certification on Robotics Process Automation (RPA) during the IV or V semester vacation by choosing Automation Anywhere or UiPath course or both. The evaluation for the course shall be done after successful completion of certification on any one or both during VI semester followed by internal assessment and submission of report.

.

Course Code: **21ECAP801**	Course Title: **Capstone Project Work**	
L-T-P: **0-0-10**	Credits: **10**	Contact Hrs: **Full Time**
ISA Marks: **100**	ESA Marks: **100+50**	Total Marks: **250**
Teaching Hrs: **Full Time**		Exam Duration: **3 Hours**

A student must carry out a project on any domain using cutting edge technologies and demonstrates the same at the end of the semester.

.

No	Content	Hrs
	Unit I	
1	**Chapter 1 : Virtual Reality and Virtual Environment and The Historical Development of VR** Introduction, Computer graphics, Real-time computer graphics, Flight Simulation, Virtually environments, Virtually here, What is required?, The benefit of virtual reality, Historical Development of VR: Introduction, Scientific landmarks.	4 Hrs
2	**Chapter 2: 3D Computer Graphics** Introduction, The virtual world space, Positioning the virtual observer, The perspective projection, Human vision, Stereo perspective projection, 3D clipping, Color theory, Simple 3D modelling, Illumination models, Reflection models, Shading algorithms, Radiosity, Hiddeny-surface removal, Realism, Stereographic image	4 Hrs
3	**Chapter 3: Geometric Modelling and Geometric Transformations** Introduction, From 2D to 3D, 3D space curves, 3D boundary representation, Other Modelling Strategies, Frames of reference; Geometric Transformations: Introduction, Frames of reference, Modelling Transformations, Instances, Picking, Flying, Scaling the VE, Collision Detection.	4 Hrs
4	**Chapter 4: A generic VR System** Introduction, The virtual environment, The computer Environment, VR technology, Modes of Interaction, VR systems.	4 Hrs
	Unit II	

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		

Curriculum Content- Course wise	**Page** 102 **of** 108
	Year: 2021-23

5	**Chapter 5 : Interacting with the Virtual World** User Interface Metaphors-Key Interactions: Manipulation, Navigation, and Communication, Manipulating a Virtual World-Manipulation Methods, Properties of Manipulation, Selection, Manipulation Operations, Manipulation Summary, Navigating in a Virtual World-Wayfinding, Trave, Navigation Summary, Interacting with Others-Shared Experience Collaborative Interaction, Interacting with the VR System (Metacommands)	**8 Hrs**
6	**Chapter 6: The Virtual Reality Experience** Immersion-Physical/Sensory Immersion, Mental Immersion The Role of Realism in Immersion Point of View Venue, Rules of the Virtual World: Physics- Types of Virtual World Physics, User Interaction with the World Physics, Simulation/Mathematical Model, Object Co-interaction, World Persistence, Interference from the Physics of the Real World, Substance of the Virtual World - World Geography, Objects, Agents, User Interface Elements	**8 Hrs**
	Unit – III	
7	**Chapter 7: Experience Design. Applying VR to a Problem** Will VR Meet Your Goals? - Is VR the Appropriate Medium?, Creating a VR Application - Adapting from Other Media, Adapting from an Existing VR Experience, Creating a New VR Experience, Designing a VR Experience- Design Deliberately, Design with the System in Mind, Design with the Venue in Mind, Design with the Audience in Mind, Consider Design Tradeoffs, Design the User Objective, Design the End of the Experience, Document, Deploy, and Evaluate the Experience, The Future of VR Design	**4 Hrs**
8	**Chapter 8: The Future of Virtual Reality** The State of VR - Technology Trigger, Peak of Inflated Expectations, Trough of Disillusionment, Slope of Enlightenment, Plateau of Productivity, The Field of VR Research, Trends, Technology Futures - Display Technologies, Input Technologies, Software - Hardware Interface Software, Application Development Software, Application Futures	**4 Hrs**

Text Book:

1. John Vince, Virtual Reality Systems , Pearson, 2002
2. William R. Sherman, Alan B. Craig, Understanding Virtual Reality, Inteface, Application and Design, MORGAN KAUFMANN PUBLISHERS, 2003

Activities

#	TOPICS	ACTIVITY
1	**Getting Started**	Demonstrate the following: ● The Dashboard interface

	FORM	**Document #:** **FMCD2005**	**Rev: 1.1**
KLE TECH.	ISO 9001: 2015- KLE TECH Department of Master of Computer Applications		
Curriculum Content- Course wise		**Page** 103 **of** 108	
		Year: 2021-23	

		● Creating a new scene ● The Sumerian editor interface
2	**Amazon Sumerian Basics: Create your first scene**	Learn and accomplish the following: ● Create a room with primitive entities (Box) ● Cover lighting basics ● Import entities from the asset library ● Place and move objects ● Create interactive behaviors using the State Machine ● Add basic animations
3	**State Machine Basics**	Build **behaviors**, using a collection of **States** that are connected by **Transitions**, as an entity transitions from one state to another.
4	**Events Basics**	Create a simple action to rotate a *Box* entity when we click a *Sphere*.

5	**Timeline Basics**	Animate a drone to fly around a large sphere using the **Timeline** and **Keyframes**. The **Timeline** enables you to create animations and movements for scene entities. You can also trigger them by actions you set in the **State Machine**.
6	**Importing third Party Assets**	Import asset bundles that consist of multiple files by dragging and dropping them onto the canvas. Using this capability, you can import .obj files, .mtl files, meshes, materials, and textures using a single drag and drop.
7	**Material Fundamentals using the Classic Shader**	Demonstrate the concepts of adding Textures and optimizing the Material component by working with sphere Primitives.

Evaluation Scheme

4. In Semester Assessment (ISA)

Assessment	Marks
ISA	**100**
ESA	**---**
Total	**100**

No	Content	Hrs
	Unit I	
1	**Chapter 1 : Introduction to Internet of Things (IoT)** Definition & Characteristics of IoT, Physical Design of IoT: IoT protocols, Logical Design of IoT: IoT functional blocks, communication models and APIs.	6 Hrs
2	**Chapter 2 : IoT Enabling Technologies** Wireless Sensor Networks, Cloud Computing, Big Data Analytics, Communication Protocols, Embedded Systems, IoT Levels and Deployment Templates.	5 Hrs
3	**Chapter 3 : Domain specific IoTs** Home Automation ,Cities, Environment ,Energy, Retail, Logistics, Agriculture, Industry, Health and Lifestyle.	5 Hrs
	Unit II	
4	**Chapter 4 : IoT Platforms Design Methodology** IoT Design Methodology, Case Study on IoT System for Weather Monitoring.	4 Hrs
5	**Chapter 5 : IoT systems – Logical design using Python** Introduction to Python, Data types, data structures, Control of flow, functions modules, packages, file handling, data/time operations, classes, Python packages - JSON, XML, HTTPLib, URLLib, SMTPLib.	5 Hrs
6	**Chapter 6 : IoT Physical Devices and Endpoints** Basic building blocks of an IoT device, Exemplary device: Rasyberry Pi, interface (serial, SPI, I2C), Programming Rasyberry Pi with Python.	7 Hrs
	Unit III	
7	**Chapter 7 : IoT Physical Servers & Cloud Offerings** Introduction to Cloud Storage models and communication APIs ,Webserver – Web server for IoT, Cloud for IoT, Python web application framework, Designing a RESTful web API	4 Hrs

	FORM	Document #:	
	ISO 9001: 2015- KLE TECH	**FMCD2005**	**Rev: 1.1**
	Department of Master of Computer Applications		

Curriculum Content- Course wise	Page 105 of 108
	Year: 2021-23

8	**Chapter 8 : Case Studies Illustrating IoT Design**	**4 Hrs**
	Home Automation-smart lighting, home intrusion detection, Cities-smart parking.

2. Matt Richardson & Shawn Wallace, "Getting Started with Raspberry Pi", O'Reilly (SPD), 2014.

Activities

#	TOPICS	ACTIVITY
1	**Introduction to Internet of Things (IoT)**	Presentation on IoT.
2	**Domain specific IoTs**	Presentation on IoT applications.
3	**IoT systems – Logical design using Python**	Exploring & practicing Python libraries for interfacing with IoT devices like Aurdino, Raspberry Pi and sensors.
4	**IoT Physical Devices and Endpoints & IoT Physical Servers & Cloud Offerings**	1. Easy Motion and Gesture Detection by PIR Sensor. 2. Soil Moisture Sensor using moisture sensor. 3. Humidity and Temperature Monitoring System using DTH sensor. 4. Remote for TV. 5. Color Recognition system. 6. Connecting all the systems with free cloud services like Thinkspeak, Blink Android app.
5	**IoT Design**	Case study on Home Automation.

Activities

#	TOPICS	ACTIVITY
1	**Mobile Computing Through Telephony**	Implement respond to incoming SMS messages using Twilio library or any other similar services. https://www.twilio.com/docs/sms
2		Build an Interactive Voice Response (IVR) Phone Tree
3		Implement missed call service for your business using cloud telephony network https://www.ivrguru.com/missed-call-number-services
4	**Emerging Technologies.**	Design and Implement RFID-Based Information System
5		Implement Blue Tooth Application by using android Bluetooth API's in android applications to perform the following functionalities. ● Scan for the available Bluetooth devices within the range ● Use local Bluetooth adapter for paired Bluetooth devices ● Connect to other devices through service discovery ● Transfer data to and from other devices ● Manage multiple connections
6		Design a location tracking App using GPS in Android Studio.
