 KLE Technological University <small>Creating Value Leveraging Knowledge</small>	Document #: FMCD2005	Rev: 1.0
Title: Curriculum Content- Course wise			Page 1

Program : Architecture		
Course Title: DESIGN STUDIO – IV		Course Code: 15AATC208
L-S-P: 0-8-0	Credits: 6	Contact Hours: 9
ISA Marks: 50	ESA Marks: 50	Total Marks: 100
Teaching Hours: 144	Examination Duration: NA	
Course contents: Project <ol style="list-style-type: none"> 1. Scale of a project shall be limited to allow for intensive study rather than repetition of typical configuration of housing 2. Project can be attempted with added complexities like dense context, occupation based, traditional urban fabric, social status & prevalent social strata. 3. Detail from the dwelling cell to immediate shared space to communal space shall be emphasized and worked out. Socio-cultural layer of the occupants shall form a strong fabric in ultimate way of the design. 4. project shall aim at developing a very sensitive attitude toward micro level human habitation & role of architecture in enhancing or curbing the quality of living 5. Examples apartment for IT employees, government servants, teaching faculty, textile workers, Luxury flats in the center of the city, group housing in suburbs, etc. <p>Students may be required to develop a brief, translate it in to requirements and Design. At least one major exercise and one minor design/ time problem should be given. The topics not covered as design problems will have to be covered by the studio faculty members through lecture/slide show session and site visits.</p> <p>The evaluation shall be through periodic internal reviews. The students have to present the entire semester work for assessment along with Model.</p>		
Text Books: NIL		
Reference Books: <ol style="list-style-type: none"> 1. Joseph De Chiara & John Hancock Calendar, Time Saver Standards for Building Types 2. Various books and magazines about architectural design 		

Scheme for Semester End Examination (ESA)

Checking of Portfolio of Term Work / Viva.0

Student Exit Survey Form Academic Year 2019-20

Dear Student,

The following are the list of skills and competencies that architecture graduates should have. We seek your participation in the Exit Survey conducted to know your satisfaction with the *level of competency* you have achieved as a result of your education at KLETECT. For each question, indicate your answer with symbol "A" in the appropriate column/box. All individual responses will be kept confidential. Only statistically analyzed results from the entire population will be shared.

Regards,

Competencies	Level of Competency			
	Completely Dissatisfied	Dissatisfied	Satisfied	Completely Satisfied
<u>An ability to apply:</u>				
Fundamentals of spatial and architectural concepts to solve architectural problems			A	
Research abilities to seek solutions				A
Laws of natural sciences to address problems pertaining to built environment and spatial issues.			A	
<u>An ability to:</u>				
Identify, formulate, and solve architectural problems			A	
Design a system or process to seek architectural solutions				A
Use the computer as a tool for analysis & design		A		
Function on multi-disciplinary or cross-functional teams			A	
Function in culturally and ethnically diverse environments		A		
Communicate orally, informally, and in prepared talks			A	
Communicate in writing - technical reports, proposals, etc.				A
Design and conduct experiments and case studies				A
Analyze and interpret data				A

Student Exit Survey Form Academic Year 2019-20

Competencies	Level of Competency			
	Completely Dissatisfied	Dissatisfied	Satisfied	Completely Satisfied
An understanding of:				
Professional and ethical responsibilities			A	
Environmental aspects of architectural practice		A		A
The practice of architecture on a global scale			A	
The impact of spatial solutions in a global and societal context			A	
The need for engaging oneself in life-long learning				A
Basic knowledge of industry practices and standards			A	

Indicate your Answer with symbol "A" in the appropriate box.

1) How would you rate your overall satisfaction with your preparation to become an engineer?

Not Satisfied ☐ A Little Satisfied ☐ Satisfied ☒ A Very Satisfied ☐

2) In general, the department/school has provided a _____ quality academic program?

Poor ☐ OK ☐ Good ☒ A Very Good ☐

3) Rating of Quality of Academic Courses.

Poor ☐ OK ☐ Good ☒ A Very Good ☐

4) Rating of Quality of Faculty

Poor ☐ OK ☐ Good ☐ Very Good ☒ A

•Are you planning for Higher Studies? If yes, Provide details: No

•Additional comments about your educational experience at KLE Tech, Hubli.

* Climatology Analysis Software should be introduced.
* New Concepts of Architecture to be introduced as Electives.

•Are you planning for Higher Studies? If yes, Provide details: YES M.ARCH IN URBAN DESIGN

•Additional comments about your educational experience at KLE Tech, Hubli

the education for architectural professional course is good, faculty are also well qualified, but still there is need of improvement in curriculum, subject practice field education, syllabus should be revised, need of communication skills. Institution should start higher education courses for architecture field like : urban design, urban planning, sustainable design, construction management their is a lot of demand in this field.

•Additional comments about your educational experience at KLE Tech, Hubli

Please reduce the number of sheets and increase the design thinking aspect for each assignment. Quality over quantity needs to be emphasized. I think that's a general remark from our entire batch.

• Are you planning for Higher Studies? If yes, Provide details: No

I am planning on continuing my higher studies in pedagogy, literature and landscaping architecture.

• Additional comments about your educational experience at KLE Tech, Hubli

The teaching methodology is not student friendly. Too many physical sheets to be done with less importance given to the usage of digital tools and non-linear design processes. Some faculty members are hostile and not student friendly, sometimes not entertaining any out-of-class discussions. High focus on old, sometimes redundant, architectural practices and references.

Alumni Survey Form

Dear proud alumni,

The following are the list of skills and competencies that Architecture graduates should have. We seek your participation in the Alumni Survey conducted to know your satisfaction with the *level of competency* you have achieved as a result of your education at the Institution and also able to practice the same. For each question, indicate your answer with symbol "A" in the appropriate column/box. All individual responses will be kept confidential. Only statistically analyzed results from the entire population will be shared.

Regards,
Head of the department/School

S.No	Competencies	Level of Competency			
		Completely Dissatisfied	Dissatisfied	Satisfied	Completely Satisfied
1	Architectural knowledge :				
	Ability to apply the knowledge of science and architectural fundamentals and concepts for the solution of spatial problems.			A	
2	Problem analysis:				
	Ability to identify, characterize and formulate a solution plan for solving real life issues.		A		
	Ability to execute a solution process and analyze results		A		
3	Design/Development of Solutions:				
	Ability to design components, systems or processes that meet specified needs, following appropriate spatial design process			A	
4	Conduct investigations of complex problems:				
	Ability to conduct case studies and site analysis through design of analytical framework, strategies and guidelines to understand and solve real time spatial and architectural issues.			A	
	Ability to critically analyze and interpret data to reach valid conclusions			A	
5	Modern tool usage:				
	Ability to identify / create and use appropriate modern spatial and Architectural solutions, techniques and resources to solve architectural and spatial problems		A		
6	The Architect and society:

Employers Feedback form

Dear Sir,

We seek your kind participation in this process of collecting feedback about our graduates serving in your organization. Your inputs will be helping us to make required modifications in the existing curriculum, pedagogy to enhance the competencies of the graduating engineers. For each question, indicate your opinion with a tick mark in the appropriate column. All individual responses will be kept confidential. Only statistically analyzed results from the entire population will be shared.

Regards,

Head of the department/School *of Architecture.*

Please rank the following qualities: 5 = excellent, 4 = high, 3 = good, 2 = average, 1 = low, NA= Not Applicable

S.No	Qualities	1	2	3	4	5	NA
1	Ability to apply the architectural, urbanism, built environment and spatial solutions.						
2	Ability to identify, characterize and formulate a solution plan for solving spatial and architectural problems.						
3	Ability to execute a well framed process to analyze spatial problems leading to architectural and spatial solutions.						
4	Ability to design area and building program leading to appropriate architectural solutions.						
5	Ability to conduct investigations through case studies, field studies to understand and address the real time spatial and architectural issues.						
6	Ability to critically analyse and interpret data to reach valid conclusions.						
7	Ability to identify / create and use appropriate modern tools, techniques and resources to achieve architectural solutions.	A					
8	Demonstrate an understanding of professional architectural and urban regulations, legislation and standards.				A		
9	Ability to understand the impact of the professional architectural spatial solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development	A					
10	Ability to apply ethical principles and commit to professional ethics and responsibilities and norms of the architectural practice.				A

Consolidated Report of feedback collected for Board of studies for the Academic year 2019-20

Feedback from Stake holders

Employers Feedback:

- Students lack awareness on addressing climatological factors in architectural design.
- Students lack ability to apply the knowledge of sustainability and climate responsive architecture in Architectural design projects.
- Recommended climatic softwares like climate consultant, Ecotect, for efficient analysis of climatic data in design studio
- Students lack in graphical presentation skills in digital drawings.
- Students lack the ability to suggest appropriate material in design project.

Teachers Feedback (Pre-BoS MoM):

- Lack of knowledge of rural issues and development in Indian context.
- Lack of exposure to rural context in architecture.

Students Feedback:

- Suggested to introduce short films to communicate design ideas.

Alumni Feedback:

- Recommended for introduction of parametric tools in design.
- Recommended to offer electives with social impact and cater to profession.

HOS/HOD
Head, School of Architecture
KLE Technological University
SVBCET Campus, Hubballi-31.

Action Taken Report Approved in Board of Studies dated 15/03/2019 and implemented with effect from 2019-20

Observations/ Recommendations based on feedback		POs impacted
Employers Feedback: <ul style="list-style-type: none"> Students lack awareness on addressing climatological factors in architectural design. PO1- Professional Communication PO3- Pre-Design PO8- Environmental systems PO9- Building Technology
Actions taken	Course Revised/ Added	BoS approved Date
1. Introduction of Rural Context in design studio. Mapping of Rural Settlement to be undertaken for better understanding of rural context (PO3)	Architectural Design III 18AATC201	15/03/2019
2. Introduction of design project with respect to climate and sustainability aspects using softwares. (PO8)	Climatology 18AATC204	
3. Introduction of climate responsiveness as a theme for design project. (PO8)	Architectural Design IV 18AATC208	
4. Material palette with specification is introduced as a part of design project assessment (PO9)	Architectural Design III & IV 18AATC201, 18AATC208	
5. Introduction of Digital tools like Rhino for Parametric design (PO1)	Digital 3D 18AATE205	

PO'S	School of Architecture -APPROVED PROGRAM OUTCOMES(PO'S)
PO1	Professional Communication
PO2	Design Skills
PO3	Pre-Design
PO4	Ordering system
PO5	Socio cultural study-History and global culture
PO6	Technical Documentation
PO7	Structural systems
PO8	Environmental systems
PO9	Building Technology-building material and assemblies
PO10	Building service systems
PO11	Financial considerations
PO12	Professional Practice-Project management, Business practice, Legal responsibilities, Professional conduct.
PO13	Advance Design skills –Research and Integrated evaluations.

SCHOOL OF ARCHITECTURE

BOS 2019-20

16-03-2019.

Minutes of meeting

Agenda:

1. Review of 2015-20 batch syllabus for IX & X semesters.
2. Review of 2018-23 batch syllabus for III & IV semesters.
3. Electives for 2018-23 batch & 2015-20 batch (X-Semester).
4. Curriculum review of 2018-23 batch.
5. Design curriculum & design discussion.
6. 2014-19 batch credit revision.

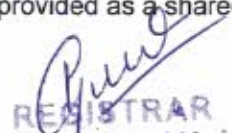

The following Proposals by BOS internal committee were approved by BOS members

1. The syllabus of Building Constructions & Materials- III & IV shall have End Semester Examinations as theory exam of 3 hours for 18-23 batch. The course shall be conducted as studio course.
2. The theory course "Quantity Survey & Specifications" is shifted to IV-semester & the studio course "Landscape Design" is shifted to V-semester.
3. The credit of Architectural Design-IX –Thesis is increased from 18 to 20credits.
4. The course Measure drawing is shifted to III-semester for 2018-23 batch.
5. Introduction of New Elective courses for VI semester for 2018-23 batch

Suggestions by External BOS members

1. Introduce "Rural study" in III or IV semester. Mapping of settlement can be undertaken for "Rural Studio".
2. Climate responsive design principles should be addressed in design. Softwares like Ecotect, IESVE, Climate consultant etc should be used to analyse climatic parameters. Design considerations for various climate conditions are to be addressed through built forms.
3. Vertical studio of 1 or 2 weeks should be introduced for V-semester.
4. Sustainability issues and principles should be introduced in Architectural Design Studio.
5. A new process of Digital Drawings submissions shall be inculcated from IV semester onwards for Building Construction and Materials.
6. In Skill development workshops, the soft skills like communication and presentation skills can be included.
7. Rainwater harvesting and Solid waste management to be included in Services.
8. New electives like Art Appreciation, Human Centered Design, Architectural Painting can be introduced to enhance observative and communicative skills
9. Parametric tools & assembly system, related software can be provided as a shared facility.

KLE Technological University
SVBCET Campus, Hubballi-31.

REGISTRAR
KLE Technological University
HUBBALLI-580 031

10. Introduce more electives with societal impact and that cater to industry, such as Parametric design, Building Economics, Contemporary Vernacular Architecture, Alternate Technology, etc
11. Introduce short films to communicate the Thesis work for X semester Architectural Design-IX in syllabus.
12. "Artificial Intelligence" should be discussed with Computer Science faculty, with respect to Architectural field.
13. Career counselling session can be conducted for X semester to "understand the opportunities after B. Arch.
14. Material palette with specifications should be introduced as a part of Design curriculum for every semester.
15. One Best work of all the courses by the students should be published.
16. Revision of credits of III semester of 2014-19 batch. A credit of Architectural Presentation is revised to 1 credit.

Dr. Vinaya Hiremath

	 KLE Technological University Creating Value Leveraging Knowledge	Document #: FMCD2005	Rev: 1.0
Title: Curriculum Content- Course wise			Page 1

Program : Architecture		
Course Title: Architectural Design – IV		Course Code: 18AATC208
L-S-P:0-6-0	Credits: 6	Contact Hours:9
ISA Marks: 50	ESA Marks: 50	Total Marks: 100
Teaching Hours: 144	Examination Duration: NA	
Course contents: To develop skills for comprehensive understanding and dealing with Climate Responsive Architecture. Provide skills for designing multi-user and multi level spaces. The design issues to be addressed are <ul style="list-style-type: none"> • Climate Responsive • Integration of environment & built form. • Integration the horizontal and vertical circulation • Correlation of the materials and the resulting form. The list of suggested spaces to be covered as design Public Libraries, Public and Semipublic Office Spaces, Resorts, Recreational Clubs, Automobile Showrooms etc. Necessary theoretical inputs to be given highlighting the norms and design issues. At least one major exercise and one minor design/ time problem should be given. The topics covered as design projects will have to be covered by the studio faculty members through lecture/slide show session and site visits.		
Scheme for Internal semester assessment (ISA) The Portfolio covering the given topics and the study models shall be presented. The evaluation shall be through periodic internal reviews. The students have to present the entire semester work for assessment along with Models. Regular Assignments, Architectural models, rendered sheets and photos		
Scheme for Semester End Assessment (ESA) Term work: Evaluation of Portfolio, assignments by internal and external examiners/ Viva		
Mode of assessment : Portfolio		
Text Books: NIL		
Reference Books: <ol style="list-style-type: none"> 1. Joseph De Chiara & John Hancock Calendar, Time Saver Standards for Building Types 2. Various books and magazines about architectural design 3. Architecture: Form, Space and Order, Ching, Francis DK
