

Methodology Adopted for Mentor-Mentee Process

1. Department/School Head assigns mentor –mentee in the ratio 1:20
2. This process is carried out twice in a semester
3. Mentors can access history pertaining to student profile, family background, previous years academic performance and current academic performance from the software-Contineo
4. Contineo is an ERP software used for different applications in which one module is assigned to get the student information which aids in mentoring process.
5. Effectiveness of mentor-mentee is documented.
6. Following are the screen shots of the mentoring process

Mentoring is done based on the students profile/academics, one to one in physical mode. In the mentoring process, students are advised/motivated to improve their overall performances. Further, students with better academic performances are encouraged to work in their interested domains/areas like sports, writing conference/journal papers etc.
