Details of the Program/Report:

KLE Technological University, Hubli (formerly known as BVB College of Engineering and Tech.,) is holding its second 'E-Summit' under the auspices of 'Center for Technology Innovation and Entrepreneurship' (CTIE). CTIE aims to build an entrepreneurial ecosystem on the BVB campus and has incubated over 36 tech ventures. Since last E-Summit of 2015, we have 5 student start-ups on our campus!

E-summit, a festival for young start-ups and students of the region, to explore entrepreneurship landscape in a new way that will inculcate entrepreneurial thinking in the young minds. 'E-Summit 2016' is a coveted opportunity for students to interact with experienced entrepreneurs and other likeminded achievers.

This event shall also provide a platform for young entrepreneurs to pitch their ideas, get validated and may even win funding! E-summit offers all these events on one platter. Come, be a part and change the

164.E-Summit 2016

way we live! I'm sure your presence will really inspire and motivate students to unleash their entrepreneurial leadership potential through media.

The exhibition was deemed to be a success as more than **1400 footfalls** were recorded including the two days. The **consolidated leads** available amongst the startups to work on were about **10% of the footfalls**. One of the highlight of the exhibition was the attention, the exhibition had garnered from outside the campus.

Number of Participants: 1400
