77.Global Entrepreneurship & Innovation Student Exchange Program 2018-19

Details of the Program/Report:

Student Exchange Program is a two week course that drives a multi – disciplinary, multi – cultural set up with students of US, Japan, China and other international institutes participating so that each student appreciates the varied background and experience that every other colleague of his brings to the class room. It promotes collaborative learning on an international platform. Started in 2013, in collaboration of BVB college of Engineering, Hubli and Manning School of Business at University of Massachusetts, Lowell, USA this program has only been growing and proved more successful every year.

SEP is held in the USA in June of every year and in Hubli in December of every year. In 2017, China also hosted the SEP in July.

Out of the students that attended this exchange about 15 students have gone on to have a successful business enterprise of their own.

Students gathered for the program on 29th of December, 2018 and were welcomed with a grand orientation. It took them some time to get acquainted with each other especially because of the language and other barriers. But as the classes started and as they started working in teams, they got connected to more people in the program. The classes in this program were also planned very interestingly. They were very interactive and were almost never a monologue. The interactive class discussions which included case studies; basic concepts; global entrepreneurship; process and entrepreneurship components such as marketing, financing, designing business model, team building activities and most importantly presentation skills. The students were made to sit in teams for all the classes which encouraged peer learning.

As the days passed with the interesting classes, group discussions, fun sessions in scholar house and much more, the professors also made sure that students never fall short of motivation. Every now and then they were given a dose of motivation with guest speakers sharing their exciting journeys .The participants also got to visit Akshay Patra, India's Largest Kitchen and Utsav Rock Garden as a part of field trips. Also, to give the foreign participants an essence of Indian Culture, one of the days was celebrated as Ethnic Day which turned out to be very colorful and fun.

The overall experience of the Student Exchange Program has been life changing and enlightening for both Indian and International students. In these two weeks, that they stayed and learned together, they got to make many friends and collected beautiful memories to be cherished. More importantly they got to experience what it's like to be in a diverse environment and how it contributes to innovation.

No. of Participants : 51
